HITEX EVOTOP

1

1 EVOTOP shooting jacket

The EVOTOP shooting jacket is made from top quality and unique material:

- Evotex material, in combination with parts of soft perforated leather; air system – adapts optimally to the shooter's body.
- Maximum stiffness, while still conforming to ISSF rules.
- The adjustment of the sling offers numerous variations.
- The sling mount can be adjusted.
- Metal clips in the back of the jacket for fixing the start number.
- Supporting parts of the elbows and shoulders are made of Top Grip.
- Elasticated material around the elbow reduces wrinkles and allows the arm to bend easily in the standing position.
- The right sleeve is made of soft leather at the back.
- This model of shooting jacket is available for both right and left-handed shooters.
- Buttons are made of dural and are very secure thanks to the screw technology.
- Available in many colour combinations.

Material:

60% polyester, 17% leather, 15% cotton, 5% Top Grip, 3% elastane

Item No.: 95100

2 EVOTOP shooting trousers

- Combination of finest leather and EVOTEX Material.
- The Velcro fasteners on the waistband and on the right trouser leg allow individual adjustments, e.g. to compensate for small fluctuations in the weight of the shooter.
- The inside of the waistband is made of a cord fabric and prevents the trousers from slipping.
- The trousers have two long 2-way zippers which can be opened from top or bottom in different positions.
- The left front side is made from soft leather to provide comfort without pressure marks when in the kneeling position.
- A leather insert in the crotch permits wider foot positioning when in the kneeling position.
- The trousers leg cuffs are made from leather to avoid balance problems when they sit on the boots.
- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position.

Material:

75% polyester, 12% leather, 8% canvas, 5% Top Grip

Item No.: 95101

2

HITEX EVOMIX

3

3 Shooting jacket EVOMIX

The difference to the EVOTOP jacket is, that the sleeve is made of canvas, the padding on the arm is made of anti slip rubber and the jacket has in some areas a simple cut construction to offer also a more favourable alternative.

Material:

40% polyester, 35% cotton, 15% leather, 5% elasthan, 5% rubber

Item No.: 95120

4

4 Shooting trousers EVOMIX

- Processing leather, canvas and EVOTEX material.
- Velcro fastening on the waistband and right trouser leg allow individual adjustment.
- Inside of the waistband is made from cord fabric and thus avoids shifting of the pants.
- Two long 2-way-zippers allow individual adjustment from top or bottom when shooting in different positions.
- Left front side is made from soft leather to provide comfort without pressure marks when in kneeling position.
- Leather part in the stride grants wider foot positioning when in kneeling position.
- Grip padding avoid pressure marks when in kneeling position.

Material:

50% canvas, 40% polyester, 5% leather, 5% rubber

Item No.: 95121

Video info for tailor-made:
www.youtube.com/ahgAnschuetz

Also available tailor-made and in a left-handed version!

HITEX MATCH

1

1 Hitex jacket Match

- CZ GRIP material is used on the supporting places.
- On the left upper arm there is also soft perforated leather (Air-System).
- The shoulder part of the shooting hand is made of soft leather so that the sleeve enables free movement.
- Buttons are made of dural. You can choose from a vast range of colors. The buttons are held-in-place thanks to a screw and pad. Their replacement is very easy.

Material:

Outer material: 80% cotton, 12% leather, 5% rubber
3% elasthan
Lining: 100% cotton

Colours:

black-white

Item No.: 95600 - with rubber layer

Item No.: 95620 - with Top Grip layer

2 Hitex pants Match

- Shooting trousers MATCH are made of double Canvas except the back parts of the legs that are made of Canvas.
- Soft perforated leather (Air-System) crotch enables maximum flexibility and comfort.
- CZ GRIP on the knees and around the bottom for extra comfort and support in the kneeling position.
- Long two-way zippers on the back sides of the legs for more comfort in the kneeling position.

Material:

Outer material: 90% cotton, 5% leather, 5% rubber
Lining: 100% cotton-canvas

Item No.: 95601 - with rubber layer

Item No.: 95621 - with Top Grip layer

2

3 BUTTON with screw

1 pcs, material: plastic

Seat pad made of two Top Grip layers a´ 4 mm (total 8 mm thickness).

Item No.: 197

CHAMPION

1

1 Shooting jacket CHAMPION

- The shooting jacket Mod. Champion is characterized by a sophisticated material mix of sturdy polyester-linen fabric and soft cowhide leather.
- The high-quality, non-slip Top Grip coating has been used on the arm and shoulder pads, which enables optimum adhesion of the support arm in combination with the textile leather in the standing position.
- The soft, breathable leather in the arm and neck area ensures the best possible climate in the shoulder area.
- The sling attachment offers many attachment options for the shooting sling. Stretch fabric under the arms and perforated stretch in the crooks of the arms ensure good mobility.
- A shoulder strap on the back eliminates the material bulge when shooting prone.
- 5 adjustable aluminum screw buttons for individual adjustment of the jacket to the body.

Material:

40% polyester, 35% cowhide, 25% cotton

Inner lining: 52% polyester, 48% cotton

Covering: 100% rubber

Color: grey / blue

Item No.: 169

2

2 Shooting trousers CHAMPION

SHOOTING BOOTS

3

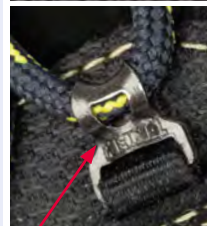

3 ahg-Shooting boots STRONG with new rear spoiler

- A** Comfortable, tight lacing prevents pressure in kneeling position and adjusts immediately to any foot form.
- B** Thermoplastic material in the complete heel, outer and inner foot area provides an improved side stability.
- C** Newly revised inner shoe for more comfortable standing.
- 1** Well padded tongues made of perforated material avoid pressure and guarantee a perfect air circulation.
- 2** Perforation holes in the outer shaft plus porous padding foames allow comforting air circulation.
- 3** The toe top is made of soft, elastic rubber with a strong grip in order to fix the position of the boot in the kneeling position.
- 4** Velcro closure to ensure a snug fit.
- 5** The new system offers a pressure-free fixation of the foot without obstructing blood circulation. The two-piece, non-flexible nylon string makes a perfect fit, the padding prevents pressure build-up. Being an integral part of the shaft and furnished with an inner and outer set of hooks this system provides a two-layer lacing. The deeper hook which is connected to the Digafix-system improves also the sitting position of the heels.
- 6** New rear spoiler improving the comfort in kneeling position.
- 7** New innersole with MFS Vakuum® foam, adapts exactly and without pressure to any shape of foot in the ankle, cuff and tongue areas. Extends to the ball of the foot. The foot is enclosed snugly yet softly.

Material:
Upper material: leather
Sole: rubber

Sizes:
From 35 to 49 (2 ½ to 13)

Item No.: 135

SHOOTING BOOTS

1 Shooting boots COMPETITION

Designed by shooters, for shooters.

- The entire tongue is a combination of 3-D mesh material which provides better air circulation in the boot (no build-up of heat) and reticulated foam padding, which improves the wearing comfort. This combination makes all the difference.
- The Velcro integrated into the tongue allows it to be individually adjusted to the instep and fixed in position.
- The tongue, which extends well forward, is designed so the base can be individually and very snugly fixed over the entire length. Individual adjustment is thus easy to achieve.
- The special last shape is designed so that the front of the sole, and not the front of the boot, is in contact with the ground when shooting in the kneeling position. A stable position can be achieved in this way.
- The rear edge of the sole is slanted slightly to improve the seating in the kneeling position.
- Velcro fastener facilitates fine adjustment of the boot.
- The two reinforcing ribs on the side strengthen the lateral hold and the stability of the foot in the boot.
- Decorative stitching on the outside gives the boot a sporty appearance.
- Due to its construction, the Ergofit inner sole has very good stabilising properties.
- The shoe complies to the new ISSF rule 2013.

Material:

Upper material: leather

Sole: rubber

Sizes:

35 – 51 (3 – 14½)

Item No.: 137

2 Sports shoes ALLROUND STRONG

This newly designed shoe with a sporty look is, as the name Allround suggests, a shoe that can be used for various disciplines such as running target, trap, skeet, pistol and also rifle shooting.

- Well padded tongues distribute all kinds of pressure and prevent pressure pains.
- Sturdy shoe.
- Comfortable lacing.
- Beautiful finish inside and outside gives the shoes a sporty look.
- The orthopaedic insole prevents rapid tiring of the foot during competitions.

Material:

Upper material: leather

Sole: rubber

Sizes:

From 36 – 48 (3 – 12)

Item No.: 134

1

2

With raised heel wedge!

SHOOTING BOOTS

3

3 Shooting boots EASY

- The budget-priced shooting boot with customary Meindl quality.
- Orthopaedic insole.
- Optimum workmanship for stability.
- Stable, straight sole for safe shooting position.
- The shoe complies to the new ISSF rule 2013.

Material:

Upper material: leather

Sole: rubber

Sizes:

37 – 47 (3½ to 12)

Item No.: 132

4 SHOE TREE

The shoe tree for shooting boots will prolong the life of your boots and ensures constant flat soles for many years.

For all common shooting boot sizes from 36 – 50.

Item No.: 136

5 LACES

- For shooting boots, 1 set.
- Length: 180 cm.

Item No.: 133-2

4

5

6 PRONE MAT

The ahg prone mat consists of 4 padded segments which can be easily folded up and fastened with Velcro fasteners.

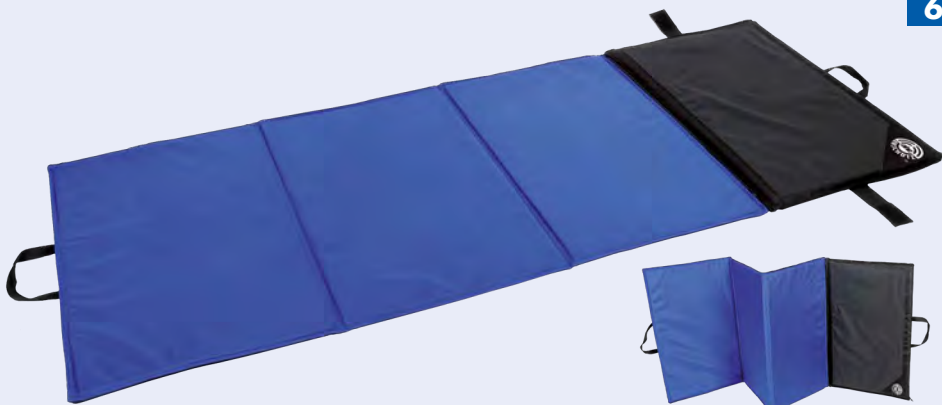

- Carrying straps facilitate safe transport.
- An extra rubber layer in the elbow area prevents sliding when in the shooting position.
- Detachable elbow mat.

Dimensions: 200 x 80 cm,

Weight: 2 kg

Item No.: 385

SHOOTING GLOVES

ahg shooting gloves in different colours and materials.

As individual as your personality. The right model for every taste.

But all models have one thing in common: Quality.

Optimum fit • Comfortable cut • Non-slip padding, GRIP or TOP GRIP

1 ahg-Anschütz glove CONCEPT I

The ahg-Anschütz glove CONCEPT stands out due to following characteristics:

- Breathable air mesh material provides better air circulation within the glove and therefore optimizes climate management inside the glove.
- Formed rubber parts on the inner and outer hand ensure a better pressure distribution caused by the sling and rifle stock.
- Rubberized pads on the fingers avoid sliding of the rifle.
- Gel padding between thumb and index finger reduce pressure pain which could be caused by the handstop.
- Rubberized pads on the fingers on the hand palm avoid sliding of the rifle stock.
- Stretch band on the wrist for comfortable putting on and pulling off as well as ideal fitting.
- Two quick-pull helper for better handling when taking off the glove were also attached.

Material:

54% leather, 29% polyester, 11% polyamid, 3% elastodien, 2% elasthan, 1% polyurethan
Inner lining: 100% polyester

Sizes: XXS, XS, S, M, L, XL

For right-handed shooters:

Item No.: 122-C (Color anthracite/red)

2 ahg-Anschütz glove CONCEPT I

Item No.: 122-L

3 COLOR 2

5-finger glove with

- Top Grip padding.
- Stretch band at the wrist.
- Colour combination: red-blue.

Material:

Upper material: 100% polyester (amara)

Inner lining: 34% wool, 33% viscose, 33% polyacryl

Padding: top grip

Sizes: XS, S, M, L, XL

For right-handed shooters:

Item No.: 110

For left-handed shooters:

Item No.: 110-L

4 THERMO-STAR

5-finger-glove. The latest generation of shooting gloves from ahg-Anschütz offers you the following advantages, which pay off noticeably in competition.

- Optimum temperature circulation is achieved by using mesh fabric on the back of the hand, palm and the perforated layer on the fingers, so that heat build-up in the glove is reduced.
- By using the latest high-tech materials, the back of the hand is reinforced and provides additional support on the wrist.
- Dampening materials are stretched from the back of the hand to the palm of the hand, so that the pressure of the hand stop is optimally distributed over the hand during the prone position.
- TOP GRIP coating prevents the weapon from slipping.

Material:

Upper material: 60% rubber, 20% PU, 8% polyamide, 6% leather, 6% elastic

Inner lining: 34% wool, 33% viscose, 33% polyacrylic

Trimming: Top Grip

Sizes: XS, S, M, L, XL.

(For right hand shooters only.)

5

5 MULTI GRIP

Open 5-finger glove made of a combination of robust microfiber with a proven trim of Top Grip material in the backhand and palm. Airmesh material on the fingers of the palm, provides good ventilation. Highly breathable Active Dry was used for the inner lining, making it much easier to put on the glove even with clammy hands.

- Glove remains soft and supple even in cold weather and ensures pleasant wearing comfort.
- Top grip coating prevents slipping of the sporting weapon.
- Short shaft of the thumb and index finger allows easy loading of the sporting firearm.

Material:

Outer material: 60% polychloride, 12% cotton, 11% leather, 9% polyamide, 5% polyurethane, 3% polyester

Lining: 87% polyester, 13% spandex

Sizes: XXS, XS, S, M, L, XL, XXL

For right-hand shooters:

Item No.: 129

6

6 CONTACT

The ahg-shooting glove Contact offers the supporting hand more direct contact to the rifle, much freedom of movement and maximum padding. Thumb and index finger are open to allow comfortable loading of the rifle. The processed microfiber material is breathable and reduces perspiration of the hand. This material is layered with silicone for additional grip. The Griptec anti-slip material on the inner and outer side provides a secure grip and avoids sliding of the rifle while in position. The Griptec is padded with a breathable high tech foamed material, called Poron, which absorbs pressure and vibrations up to 90%.

Material:

41% polyurethane, 21% polyester, 21% polyamide, 13% polyethylene, 4% elastane

Sizes: XS, S, M, L, XL, XXL

For right-handed shooters:

Item No.: 118

For left-handed shooters:

Item No.: 118-L

7

7 SOFT TOUCH SHORT

The ahg-shooting glove Soft Touch offers the supporting hand more direct contact to the sports equipment, a lot of freedom of movement and maximum padding. The processed microfiber material with trimmings of digital leather in the backhand is breathable and reduces heavy sweating of the hand. The padding made of Poron XRD cushions the weight of the sports weapon pleasantly. The palm made of robust microfiber with inserts of Lycra, which leads to a reduction of wrinkles, and 3 under-padded Poron segments with silicone pressure improve grip and pressure distribution on the sports equipment. Additional Poron padding has been added between the thumb and index finger to reduce pressure from the hand-stop on the hand. The silicone print on the palm prevents the sports equipment from slipping.

Material:

Outer material: 40% polyamide, 25% polyurethane, 12% polyester, 10% leather, 7% elastodiene, 6% elastane

Lining: 100% polyester

Sizes: XXS, XS, S, M, L, XL, XXL

For right-handed shooters:

Item No.: 126

For left-handed shooters:

Item No.: 126-L

SHOOTING GLOVES

All shooting gloves conform to ISSF & DSB rules.

1

1 Trigger glove Trigger II

The backhand of the Trigger II is made of lightweight, permeable to air Micronet material that fits perfectly to the hand. The palm is made of durable microfiber with silicone print for a safe grip. The glove is easy to put on over the wrist due to its unique cuff construction and has a quick-pull removal feature. The Trigger II is washable up to 30 °C.

Material:

74% polyamide, 14% polyurethane, 12% elastane

Sizes: XXS, XS, S, M, L, XL, XXL

For right-handed shooters: For left-handed shooters:

Item No.: 94

Item No.: 94-L

2

2 Trigger glove ALLROUND

As the name suggests, this glove can be used for benchrest or freehand shooting. The backhand is made of elastic and breathable material, the lightly padded palm is made of breathable Active Dry fabric. The silicone print on the palm ensures a good grip. The glove is easy to put on over the wrist due to its unique cuff construction and has a quick-pull removal aid. The Allround glove is washable up to 30 °C.

Material:

42% Polyester, 41% Polyamide, 16% Spandex, 1% Polyurethane

Sizes: XS, S, M, L, XL, XXL

For right-handed shooters:

Item No.: 95

3

3 Supporting Glove CONTACT GEL

This especially developed shooting glove offers the shooting hand more direct contact to the sporting rifle, a lot of free moving space and max. padding.

Special anatomically shaped Poron high tech gel padding on inner and outer surfaces of the glove adapt to the hand and provide an anti-slip grip distributing pressure evenly. The area around the thumb is also padded with Poron gel in order to reduce pressure caused by the handstop.

If required, the glove can be washed at 30 °C (hand wash), vented palm area reduces excessive sweating, breathable spantex material on the upper hand and holes in the knuckle area support the venting system.

Elastic material was used between the fingers to improve the fit. An aid to help the shooter to pull and pull of the glove was also inserted.

Material:

60% polyurethan, 31% polyester, 8% polyamid, 1% elastan

Sizes: XS, S, M, L, XL, XXL

For right-handed shooters: For left-handed shooters:

Item No.: 98

Item No.: 98-L

TARGET SLINGS also available for left-handed shooters

1 Target sling CONTACT

- Non-warping synthetic fabric.
- Simple adjustment of arm loop and arm length by means of buckles.
- This target sling can even be adjusted to very short arm lengths due to the long rows of holes, so there is no pressure from the buckle on the glove when in the shooting position.

Item No.: 334 (for right-handed shooters)
Item No.: 334-B (blue) (for right-handed shooters)
Item No.: 334-L (for left-handed shooters)
Item No.: 334-short (4 cm shorter)

2 Target sling SWING

The ahg SWING target sling is the latest development from ahg-Anschütz. In this case it is a target sling with combined fine adjustment.

This sling offers the following benefits:

- Easy adjustment of the length with one hand when in the prone or kneeling position, without having to leave the position.
- Automatic axial adjustment of the front part of the sling to guarantee a permanent optimum application of force in the shooting position.
- The sling fixing and the target sling are connected by a special tarpaulin type fastener, making it possible to couple and uncouple the sling quickly and conveniently with one hand.
- The arm loop with a 4-way adjustable receptacle for the tarpaulin fastener guarantees an optimum sling position.
- In addition the arm loop can be individually adjusted to the upper arm by a buckle.
- Special, non-stretch sling material with textile inlay guarantees optimum stability.

Item No.: 341 (for right-handed shooters)
Item No.: 341-L (for left-handed shooters)

3 Target sling PROFESSIONAL

Offers additional advantages such as the well-known benefits of the ahg target slings with the swivel clip.

- Variable adjustment of the arm loop with the swivelling metal clip.
- For right or left-handed shooters.
- Small hole spacing for fine adjustment.

Material: leather (no picture)

Item No.: 330 (for right-handed shooters)

Material: synthetic, black

Item No.: 331 (for right-handed shooters)

Item No.: 331-L (for left-handed shooters)

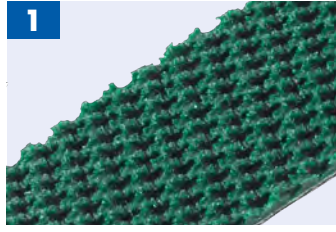

4 Target sling CONSTANT

Material: leather

Item No.: 333 (for right-handed shooters)

Material: synthetic, black

Item No.: 335 (for right-handed shooters)

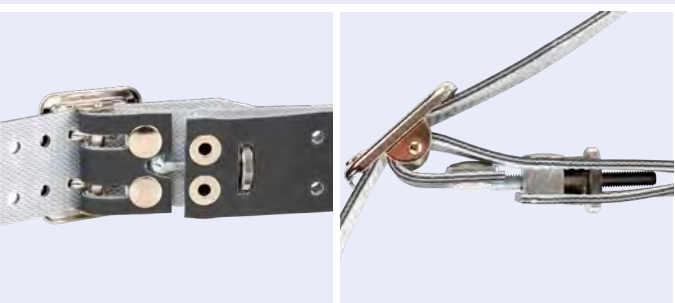

5 TARGET SLING Contact PLUS

- Non-warping synthetic fabric.
- Simple adjustment of arm loop and arm length by means of buckles.
- This target sling can even be adjusted to very short arm lengths due to the long rows of holes, so there is no pressure from the buckle on the glove when in the shooting position.
- A fine adjustment screw permits readjustment in the shooting position.

Item No.: 338

6 Target sling ULTRA

- Firm synthetic fabric blue.
- Simple adjustment of arm sling and arm length by means of buckles.
- This sling can even be adjusted to very short arm lengths due to many holes along the sling, therefore no pressure from the buckle to the glove when in position.
- Fine adjusting screw for mm length adjustment in aiming position.

Item No.: 340 (for right-handed shooters)

7 ahg-Shooting sling PLUS

This is a sling with combined precise adjustment. This sling offers the following advantages:

- Easy adjustment of length with one hand while staying in position.
- Automatic axial adaption of the forepart of the sling to guarantee a permanent optimum application of force in position.
- The connection between arm sling and fine adjustment screw is made by a curved loop. With the change of the two screw behind the curved loop, you can play and change the position of the armsling and get a different flow of power in the upper arm, to eliminate pulse.
- Sling fixing and sling are connected by a special persenning closure with which it is possible to couple and uncouple the sling quickly with one hand.
- The arm sling with four times adjustable reception for the persenning closure guarantees an optimum sling position. In addition the arm sling can be individually adapted to the upper arm by a buckle.
- Special, non-extendable sling material with textile inlay guarantees optimum stability.

Optimum connection of the sling to the shooter's jacket is ensured by a slewable metal clip on the ahg sling into which the hook (Item. 336) of the ahg-shooting jacket engages. In this manner slipping of the sling is prevented.

- Pliable, no-stretch material guarantees constant sling length.
- Optimum connection to the shooter's jacket.
- Freely mobile metal catch is hooked to the shooting jacket.
- No slipping of the sling.

Item No.: 342

SHOOTING CAPS

1

1 VISOR „DE LUXE“

- The ahg neoprene cap „de Luxe“ with integrated sweatband is a cap in which the sunshield can be individually adjusted to any desired position using a new joint fixing system.
- This new fixing system ensures that the shooter can adjust the position of his sunshield to the respective changes in light conditions when aiming.

SHOOTING CAPS

2

2 SHOOTING CAP

- The long peak on the ahg shooting cap prevents distracting light from above from having an adverse effect on the aiming process.
- A velcro fastener permits easy adjustment to any head size.
- The side sections made of netting material increase the air flow and thus provide temperature regulation.
- The cap can be made to conform to DSB and ISSF regulations simply by folding up the side flaps.
- When you are shooting according to DSB or ISSF regulations, you must cut the side flap at the seam to suit.
- If you are shooting according to the rules of another association which does not regulate the use of side flaps, they can also remain folded down.

Material:

60% cotton, 40% polyester

Item No.: 325-C (Blue-black)

Item No.: 325-S (Black with eye-shield)

3 NEOPRENE CAP DE LUXE

The sun visor on the ahg Neoprene Cap "de Luxe" can be adjusted individually to any desired position by means of a new, patented pivot fixing system.

With this new fixing system, we guarantee that the shooter will be able to set an optimum position for his sun visor for the particular changes in lighting conditions when aiming.

The inside of the ahg Neoprene Cap is covered with a towelling material which absorbs sweat and is comfortable to wear.

BACKPACKS

1 Back-Pack - ALL-IN-ONE

The ALL-IN-ONE pistol rucksack from ahg-Anschütz is made for beginners and professionals who want to enjoy the benefits of easily manageable pistol shooting. There is room for all the equipment in the various compartments: pistol in the customary case, hearing protectors, pellet box, shooter's pass, shooting boots, shooting glasses, tools, pen and target disks. With this ALL-IN-ONE product, it is impossible to forget any items of equipment - everything is stowed in view. Holders for a mobile phone and a drinks bottle complete this innovative product.

Item No.: 291

2 ahg-PISTOL BACKPACK

A perfect pistol-backpack, also a perfect companion for recreational purposes.

The outer material is classy but still robust and easy to clean by using Deuter Super Polytex (600 polyester thread). The thought-out inner sections sort the pistol case as well as boots, ear protectors, glasses and any other items usually required. The inner lining was purposely chosen in a light color in order to visually find small items quickly. Anatomic shoulder straps as well as ventilation pipe equipped airstrips polsters and AirMesh cover provide max air circulation by little back support. The Bilamat-structure made from a strong and a soft foam material layer guarantees high wearing comfort and best load distribution. Compression strings on the backpack allow carrying closely to the body by volume regulation. The front pocket, equipped with a zipper holds an organizer for cell phone charging cable and other useful utensils.

Side pockets from net material provide room for bottles and the bottom of the backpack is well padded.

Dimensions: 49 x 35 x 25 cm

Volume: 28 l

Weight: 866 g

Item No.: 298

3 SOFT CASE for Hunters and Sports Shooters

Same like soft case 9213 but without ANSCHÜTZ Logo on the pocket. Colour is completely in black.

Dimensions: 127 x 28 x 9 cm

Item No.: 9213-S (Colour black, without Logo)

4

4 SOFT CASE for Hunters and Sports Shooters

Top quality soft case made from nylon material protects your sports gear during transport. The attached lock fulfills safety requirements according to gun laws.

- Robust nylon material, water-proof.
- Sturdy 2-way-zipper.
- Two hinged accessory bags, one with pockets of various sizes.
- Padded handle.
- Lockable according to gun laws.
- Lock attached to the soft case.
- 6 cm thick inner padding.
- Two carrying strap.

Dimensions: 127 x 28 x 9 cm

Item No.: 9213 (Soft case black/blue)

5 AHG STRIKEBAG

Padded weapon carrying bag for two long guns up to a length of 113 cm.

The ahg STRIKEBAG is equipped with a Molle system inside and outside. Inside, the rifles can be individually secured using the Velcro straps provided. Three tactical accessory pockets can be attached in various ways on the outside. The accessory pouches are included in the scope of delivery. The zipper is lockable.

For comfortable transport, the ahg STRIKEBAG can be carried comfortably on the back (like a backpack). This leaves your hands free to carry additional equipment. Alternatively, use the included padded shoulder strap or carry the bag conventionally with the two carrying straps.

Scope of delivery: Gun carrying bag, three pockets for accessories (to be attached individually), shoulder strap.

External dimensions: 118 x 28 x 8 cm

Item No.: 9220

1 ahg-SOFT CASE for hunting and sport

The new soft case is equipped with a new zipper system and other useful details.

For safe transportation of the hunting or target rifle as well as the sensitive accessories. It is also possible to carry the soft case on the back due to a special belt system. In addition you can use the soft case as a pad on which you can assemble your rifle.

- Inner lining of anti-static material to avoid dirt on the rifles.
- Fixing stretch belts with velcro closure hold the rifle in a safe position.
- The cut follows the shape of the rifle to avoid any slipping in the soft case.
- Integrated holder for a spare compressed air cylinder.
- Carrying handle.
- Carrying belt system to carry the soft case on the back.
- Incl. U-lock

Dimensions: 122 x 25 x 5 cm

Item No.: 9219 (black)
Item No.: 9219-G (olive)

2

2 ahg-Anschütz Range Bag

ahg-Anschütz Range Bag made from high quality, tear-resistant nylon, offers room for two to three handguns, ammunition, hearing protection, tools and other accessories. Four small side pockets with zipper plus one compartment for a water bottle are also features of this new bag.

The large side compartment holds up to eight magazines in separate brackets. For easy and fast opening and closing of the bag it holds two zippers linked with a large loop, a combination lock comes with the bag. Removable inner pocket with a main compartment and two adjustable side pouches provide even more space. Shell bag with snap hook to attach to belt or webbing. The shoulder strap is padded and removable.

Technical Data:

- Space for two or three handguns, ammo, hearing protectors, tools etc.
- Four small compartments with zipper.
- Large side pocket offers room for up to eight magazines.
- Extractable inner pocket with main compartment and two adjustable side pouches.
- Pouch for receiver with snap hook for fastening to the pants' belt.
- One compartment for water bottle.
- Four rubber feet.
- Material: high quality, tear-resistant nylon.
- Color: black or red.

Dimensions: 60 x 37 x 27 cm

Weight: approx. 3,05 kg

Item No.: 299 (black)

Item No.: 299-R (red)

3

3 ahg-Anschütz Range Bag COMPACT

ahg-Anschütz Range Bag made from high quality, tear-resistant nylon, offers room for two handguns, ammunition, hearing protection, tools and other accessories. Four small side pockets with zipper plus one compartment for a water bottle and spray can are also features of this new bag. The large side compartment holds up to six magazines in separate brackets. For easy and fast opening and closing of the bag it holds two zippers linked with a large loop, a combination lock comes with the bag.

Removable inner pocket with a main compartment and one adjustable side pouches provide even more space. Shell bag with snap hook to attach to belt or webbing as well as a little bag for the barrel or slide. The shoulder strap is padded and removable.

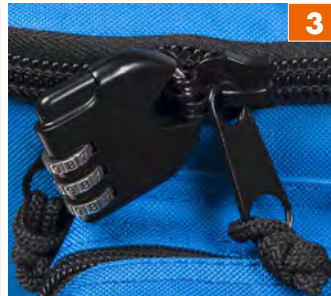

Technical Data:

- Space for two handguns, ammo, hearing protectors, tools etc.
- Four small compartments with zipper.
- Large side pocket offers room for up to six magazines
- Extractable inner pocket with main compartment and one adjustable side pouches
- Pouch for receiver with snap hook for fastening to the pants' belt
- One Compartment for water bottle and one for a spray can
- Four rubber feet
- Material: high quality, tear-resistant nylon

Dimensions: 48 x 37 x 27 cm

Weight: approx. 2,65 kg

Item No.: 288 (blue)

ROLLER BAGS

1 SPORTS BAG - XXL

The sturdy XXL sports bag on wheels from ahg-Anschütz is padded all round to protect your valuable equipment.

The 160 litre capacity is divided up as follows:

- In the opened out top there is a zipped compartment which has sufficient space for a jacket or trousers.
- In the main compartment of the XXL bag there are four subdivisions in the base, three with zip fasteners and one with ventilation holes. They provide space and protection for all other objects. Other objects such as a jacket, stands or other accessories can be stowed in the compartments.
- The underbody is made of an injection moulded hard plastic and ensures that the ahg XXL SPORTS BAG does not sag when fully packed and does not tip over when upright.
- Wheels with ball-bearings from the field of in-line skates ensure that it runs easily and supports the weight effortlessly.
- A telescopic handle for pulling the bag and several hand-holds for loading or unloading are naturally provided as well.

Dimensions: 85 x 42 x 45 cm

Capacity: approx. 160 litres

Weight: 7 kg

Item No.: 296

2 SPORTS BAG - BIG

The new two-part sports bag can be opened out from the centre by means of a zip fastener and when opened guarantees you a comprehensive view of your accessories.

You can pack your shooting jacket and shooting trousers with the minimum amount of folding in the large, lockable, single-section compartment. This will look after your clothing and keep it in good condition for longer. You can organise your valuable accessories such as shooting boots, gloves, spectacles, etc. clearly in the three-section compartment. No more bothersome and time consuming searching. The skate wheels and the extendable handle make for easy, effortless transport of the ahg sports bag.

The strong plastic base prevents deformation and protects your equipment.

Other items can be stowed in the patch pockets at the side or in the upper section.

Dimensions: 80 x 40 x 34 cm

Capacity: approx. 108 litres

Item No.: 292 (blue/black)

ROLLER BAGS

3

1 ahg - ROLLER BAG DELUXE

- This equipment bag was designed exactly for sports shooters.
- Outer dims: 83 x 38 x 42 cm.
- Total weight: 6 kg.
- Very robust wheels.
- Separate compartment for jacket, pants, boots, accessories.
- Max. weight allowance: 25 kg.
- Including key lock.

Item No.: 289

4

4 SHOOTING SPORTS BAG with wheels

The stylish ahg shooting sports bag with extendable push handle has all the features that a bag for shooters should have:

- Sufficient space for jacket, trousers, boots, stand, scope, gloves, etc.
- Robust construction of the base (5 mm plywood) gives the bag exceptional stability and prevents the base from bending.
- Two skate wheels on the base in conjunction with holding and carrying straps provide a wide selection of carrying and rolling transport options.
- Extendable handle ensures comfortable pulling.

Dimensions: 70 x 40 x 33 cm

Capacity: approx. 90 litres

Item No.: 290

STORAGE

1

1 TRANSPORT CASE EXTREME

Extreme cases are IP67 certified, tough, durable and reliable. They may be used in a variety of applications, ranging from marine, photography, scuba diving, hunting, fishing, special corps and even the manufacturing industry. These cases offer superior protection from the elements, water, dust and impacts, making them suitable for a wide array of sectors and applications.

Overview

- Watertight seal around lid.
- Automatic pressure release valve.
- Easy to open double throw latches.
- Load tested soft grip handle.
- Holes for double padlocking.
- Stackable interlocking system.
- Thick body material.
- Extra fixing points.
- Fully length hinges.
- Nylon pins, corrosion free.
- Cubed foams in the bottom and convoluted foams in the lid available as standard.
- Wheels.

Outer dimensions: 585 x 361 x 238 mm

Inner dimensions: 520 x 290 x 200 mm

Weight: 5,8 kg

Item No.: 279

2

2 ACCESSORY BAG

For rear sights and hook butt plates. The ahg accessory bag was developed to keep accessories such as hook butt plates and rear sights safe. Due to the padding in the bag, valuable accessories remain protected and do not slide about. The dimensions of the bag are such that it fits into a side pocket on the BIG roller bag (Item No. 292) without difficulty.

Dimensions: 32 x 22 x 10 cm

Item No.: 295

3

3 ahg-PISTOL SOFT CASE

- Protects the pistol against environmental influences.
- Is equipped with a 5 cm foam layer to protect the pistol against scratches and impacts.
- Top price.

Dimensions: 47 x 26 x 11 cm

Item No.: 9208

ACCESSORIES AND SERVICE BOXES

4

4 ahg-REAR SIGHT BAG

This high density foam bag protects high-grade optics from damages. The foam cushions of 2.5 cm on each side protect and secure valuable optical accessories and prevent them from sliding around.

Dimensions: 22 x 12 x 5 cm

Item No.: 9218

5

5 ahg-NEOPRENE POUCH

These small neoprene pouches with zipper are perfectly suited to transport safely rear sight and/or front sight accessories. All current pellet tins can also be stored smoothly in it and be transported securely.

Item No.:2011 (black)

Item No.:2011-P (pink)

Item No.:2011-B (blue)

6

6 TIPTON® COMPACT RANGE VISE

The Tipton® Compact Range Vise offers a completely new level of performance, securely holding the widest array of guns possible while collapsing to fit in a range bag. The compact design is a convenient solution to gun cleaning at the range.

The Compact Range Vise collapses to 11-1/4" and fully expands to 17-3/4", making it easy to carry but also fully functional when completely expanded. Six rubber feet provide the vise a very rigid, non-slip base. Two non-marring forks protect your guns' finish while holding them securely in place for cleaning, light maintenance or as an extra set of hands. The Compact Range Vise is extremely durable and is made from high quality, solvent-resistant nylon that will deliver years of lasting performance. Serious shooters know keeping their guns clean is essential to performance, making the Compact Range Vise the perfect range accessory.

Item No.: 1035

TRIPODS

1 PRONE TRIPOD

The design of the folding struts on this prone tripod enable the shooter to position the tripod very closely and ergonomically to the shooting position.

A ball head supports the positioning of the spotting scope.

The folding struts and Y-shaped pedestal are milled from solid aluminum and can be mounted and dismantled quickly and easily by means of plug-in connections.

Recessed magnets in the struts and the base keep the struts in place.

With a few manual operations, the tripod can be dismantled quickly, without tools to save space.

Total weight incl. ball head: 770 g.

Item No.: 463

2 Rifle stand NEW GENERATION

- All alu parts are lighter and milled in futuristic design.
- Extremely light by use of fiberglass-composite-tubes.
- Extremely sturdy through sophisticated foot geometry and extending lever locking system.
- Quick setup and dismantling by folding legs and lever locking system.
- Space-saving storage in supplied bag, approx. 63 cm long.
- Tripod can be placed very close to the stand due to thought-out foot geometry.

Weight: 1.49 kg

Item No.: 461

3 BENCHREST STAND SOLID

Due to a clever foot geometry and 4 individually adjustable legs, the benchrest stand SOLID can be adjusted to any position at the shooting range. Robust aluminum parts and 4 angle struts provide a high stability and steady position of the gun. For stepless adjustment, just turn and loosen the round plastic rest and fasten at the new required position. Also supplied is an infinitely adjustable ammo rest.

Total height: 75 cm

Total weight: ca. 2,8 kg

Item No.: 466

4 AMMUNITION HOLDER

For BENCHREST STAND SOLID 466.

Item No.: 467

1

2

3

4

5

6

5 SWIVEL JOINT

The technically lavish clamping mechanism inside the aluminum head is very durable. Especially layered surfaces complete the characteristics like stability and handiness. The swivel head has a connecting joint of $\frac{1}{4}$ " and $\frac{3}{8}$ ".

Item No.: 450

7

6 GUN REST

The gun rest has a $\frac{1}{4}$ " thread and is screwed on to the telescopic pole of the ahg universal tripod.

Item No.: 456

7 AMMUNITION HOLDER

The ammunition rest is clamped on to the telescopic pole ($\varnothing 21$ mm) of the "TWIN universal tripod" or on the "RIFLE STAND GERMANY".

Item No.: 459-U1

8 UNIVERSAL TRIPOD - TWIN

Two for the price of one.

The sturdy TWIN universal tripod can be used as a rifle rest or alternatively for target observation in all 3 shooting positions.

Depending on the requirements, the tripod can be used as a rifle and ammunition rest in the standing and kneeling positions or as a tripod for a spotting scope in all 3 shooting positions.

The sturdy TWIN universal tripod can be adjusted simply and quickly to any shooting position.

The eccentric clamps hold the individual sections of the telescopic pole. With a few operations, the tripod can be dismantled again and stowed in the supplied bag, where it takes up little space.

With the TWIN universal tripod, it is possible to set the telescopic pole to a maximum height of 170 cm.

Total weight: 1.780 g

Item No.: 459

8

8

8

IRIS DISCS

Well adjusted...is half way there!

The continuously adjustable iris disc enables optimum focus adjustment. By opening and closing the iris, the shooter can see the sharpness of the target changing.

The best results are obtained in the range 1.0 – 2.0. The range above 2.0 can be helpful if a shooter has his eye far away from the rear sight – e.g. when shooting in a standing position.

Below 1.0, the iris aperture may appear unround, unsharp, angular or contaminated by dust filaments. However, this is just a physical effect which occurs as a result of the small diameter. If you check the iris at its smallest setting with a magnifying glass, you will see that the aperture is perfectly round. There is scarcely any use for this extremely small range.

Very dark.
Unsharp image.

Best image of target.
Optimum adjustment possible.

Iris aperture very large.
Large distance
Rear sight / Eye.

1 IRIS DISC

- Eyepiece with interchangeable diaphragm ring - SMALL.
- Adjustment range 0,5 – 3,0 mm.
- 15 lamellar segments.
- Extra short construction.

Item No.: 9775-S (black)

Item No.: 9775-O (orange)

2 IRIS DISC

With 5-colour filter. A combination of ahg iris disc Item 9775 with 5 glass filters in the colours: light grey, dark grey, orange, yellow, C41 blue.

- Eyepiece with interchangeable diaphragm ring - SMALL.
- Adjustment range 0,5 – 3,0 mm.
- 15 lamellar segments.

Item No.: 9779-S (black)

Item No.: 9779-O (orange)

3 For BUSK/SAUER Rear Sight

IRIS DISC with 5-colour filter.

10

9 IRIS DISC with optic

With new lens optics.

- Iris disc with 1.5x magnification (from -4.5 to +4.5 diopters).
- Enables the shooter to adjust the image of the target exactly to the requirements of his eye.
- Extra short construction.

Item No.: 9530

10 IRIS DISC with optic

With full polarisation and optics.

Item No.: 9551

11

12

11 IRIS DISC with optic

With 5-colour filter and optics.

Item No.: 9570

12 IRIS DISC with optic

With 5-colour filter, optics and full polarisation.

Item No.: 9575

13

14

13 ADAPTER

Can only be used on iris discs with optics: (Item 9530, 9551, 9570, 9575), so that these can also be used without optics.

Item No.: 9577

14 IRIS DISC ERGO

- Iris disc with 5-colour filter (light grey, grey, yellow, peach and C 41 blue).
- New shape, specially designed for older shooters, optimised handling.
- Large numbers for good legibility.

Item No.: 9788

Available with 1.5x optics and integrated diopter compensation (+/- 4,5). (No illustration). can also be used without optics.

Item No.: 9789

1 DUO-IRIS APERTURE INSERT*

The inner and outer diameters of the aperture insert are continuously variable and thus offer the optimum possibilities for adjusting to the particular target sizes or lighting conditions. Due to its extremely wide adjustment range (see table) the duo iris aperture can be used for all disciplines. The duo iris aperture insert is available in 2 versions as a free-standing glass aperture Item 9760/9761 and also with cross hair, Item 9750/9751. The cross hair can be changed to a lateral hair for airgun disciplines, as with Item 9740.

2 SUPER-IRIS APERTURE INSERT

- The diameter of the aperture is continuously variable from 2,8 to 4,8 mm for optimum adjustment to the lighting conditions and target sizes during competitions. The ring size remains constant.
- The cross hair can be changed to a lateral hair with the tool supplied.
- The ahg Iris aperture insert is supplied with an M18 x 0,5 thread.

Ø M18 x 0,5		Width	Type

2,3–4,3	Item No.: 9523	1,6 mm	
2,8–4,8	Item No.: 9526	1,6 mm	

4 SUPER-IRIS-VARIO APERTURE INSERT

The first aperture insert in the world on which the tilt can be set at any time in a few seconds without the need for a tool. The insert is screwed into the front sight to the end stop by hand. It is not necessary to observe any particular orientation. The locking nut is then tightened with the hook spanner. The insert is fixed but can be rotated on its own axis to set the tilt. (There is a scale on the housing for orientation). The cross hair or lateral hair can be adjusted to the degree of tilt in any position by simple rotation and identified by a marking on the front sight. If the position is changed, the aperture can be rotated according to the marking. The cross hair can be changed to the lateral hair (as with Item 9740).

Ø M18 x 0,5		Width	Type
2,3–4,3	Item No.: 9735	1,6 mm	
2,8–4,8	Item No.: 9736	1,6 mm

2,8–4,8	Item No.: 9738	1,6 mm	
3,8–5,8	Item No.: 9739	2,0 mm	
5,0–7,5	Item No.: 9801	2,0 mm	

5

5 GLASS APERTURE - HIGH END

The aperture carrier is held in a ground glass carrier. In contrast to the previously used plexiglas, this is absolutely distortion and deformation free. The combination of glass and matt black aperture produces maximum contrast. The use of glass and metal as materials gives the HIGH END temperature stability and thus makes it also ideal for large calibre rifles. Supplied without front sight.

Diameters available:

Aperture width from 1.2 mm, in 0.1 mm steps.

Item No.: 9507 For M18 x 0,5 (Ø 3,0–7,5 mm)

Item No.: 9508 For M22 x 0,5 (Ø 3,0–10,0 mm)

6

7

6 Front sight holder RACE

The new designed front sight holder Race is an alternative to the traditional system. It has some new aiming characteristics. The new filigree design of the holder in connection with the free floating plastic front sight is very comfortable for the eye. The free floating plastic front sight enables a better incidence of light and has no disturbing front sight tunnel ring, whereby you will get a higher optical sharpness, the target can be recognized faster and the sight picture will be clearer. The holder system has no disturbing front sight tunnel ring, which distracts the eye. The target image is detected fast and centered quickly. With the second free floating plastic ring, called empty ring, you can easily control the centering of your rear sight. The empty ring relieves the eye and makes target acquisition easier. The empty ring is also available, as a separate accessory, with a black contrast ring. Instead of the empty ring you also can use an optical lens or you leave it empty.

The race fits on all common rifles by using individual spacer for each rifle type. Included in the set.

Delivery volume: front side holder incl. empty ring, Plastic front sight not included!

Item No.: 9460 holder in black
Item No.: 9460-S holder in silver

Plastic front apertures for RACE or TOP50

Plastic aperture clear or yellow with lateral hair and 1,5 mm black ring for front sight holder Top 50 and Race.

Item No.: 9465 clear (available from 2,3 - 11,0)
Item No.: 9466 yellow (available from 2,3 - 11,0)

11 ahg-ANSCHÜTZ FRONT SIGHT M 18

- ahg-Anschütz foresight tunnel with slot for metal apertures M18.
- Cantable tunnel.
- Threaded both ends for accessories.
- Made for 19xx & 20xx series ANSCHÜTZ but will also fit older models if you add a shim or use the ahg-Anschütz 4mm sight blocks.

Item No.: 9758

12 FRONT SIGHT XXL

Foresight tunnel with slot for metal apertures M18. Cantable tunnel. Fits Anschütz 19xx & 20xx series, all Anschütz air rifles, Bleiker and Grünig & Elmiger guns. Threaded both ends for accessories.

18 mm higher than normal sight 9758.

Item No.: 9730

13 FRONT SIGHT XXL SET

Foresight tunnel M18 XXL (Item 9730) incl. rear sight raiser block

Item No.: 9732

8 Front Sight - STRONG

The new ahg STRONG front sight is distinguished by the following features:

- Particularly sturdy.
- Milled slot at side for easier insertion and removal of the steel front sight insert, furthermore the size of the insert used can be seen (Front sight M 22 has no milled slot).
- Sturdy new clamping device, particularly suitable for 300 m, long range and crossbow.
- Suitable for Models 1407 – 1813 (replaces ANSCHÜTZ front sight, Item 6523).

Item No.: 9759 for front sight M18

Item No.: 9763 for front sight M22

9 Front sight - SWING

This absolutely novel design allows the sight to be turned around its own axis without the need for tools.

- The torque, i.e. the resistance to movement can be set variably on a handy adjusting collar.
- Tilt pins fitted to the sight can be easily removed.
- The scale on the sight allows the setting of different tilt angles to be repeated in the various shooting positions.
- Very pleasant target image due to the absolute symmetry and the narrow bar between the front sight base and the sight.
- The narrow bar can also be used for checking the tilt.

SWING M18

Item No.: 9720F-U8 (crystal clear,
without clamping screw)

Item No.: 9719F-U8 (pink,
without clamping screw)

3 SPECIAL INSERTS

New front sight insert, enhanced from an optical point of view, with significantly higher contrast. Due to the special geometry of the metal bush insert in the plastic body, light rays incident on the aperture are deflected outwards. Consequently the inner area of the aperture is practically free of scattered light, so that the target image appears with significantly greater contrast.

Available singly from 2,8 to 5,5 mm. For M18 thread.

Increments: 2,8–4,1 by 0,1 mm; 4,3–5,9 by 0,2 mm

Item No.: 9724 (yellow)

Item No.: 9725 (red)

Item No.: 9726 (blue)

Item No.: 9727 (crystal clear)

For M22 thread:

Item No.: 9726 F (blue)

Item No.: 9727 F (crystal clear)

4 DUST CAP

Item No.: 9722-2 (for M18 front sight)

Item No.: 9722-3 (for M22 front sight)

5 TRANSPARENT FRONT SIGHT INSERTS

For M18 thread:

Item No.: 9719 2,8–6,0 mm (pink)

Item No.: 9720 2,8–8,0 mm (crystal clear)

Item No.: 9721 2,8–4,8 mm (yellow)

Item No.: 9722 2,8–4,8 mm (grey)

Item No.: 9723 2,8–4,8 mm (red)

For M22 thread:

Item No.: 9720 F 2,8–9,1 mm (crystal clear)

Item No.: 9719 F 2,8–9,1 mm (pink)

6 CLAMPING RING for insert

For 9720 to 9727.

Item No.: 9722-1 (M18 x 0.5)

Item No.: 9722-4 (M22 x 0.5) (not shown)

7 OPTICAL LENS

Item No.: 9505-03 (0.3 diopters / M22)

Item No.: 9505-05 (0.5 diopters / M22)

Item No.: 9505-075 (0.75 diopters / M22)

Item No.: 9513-03 (0.3 diopters / M18)

Item No.: 9513-05 (0.5 diopters / M18)

Item No.: 9513-075 (0.75 diopters / M18)

15 Eagle Eye VISION CONTRAST

Most modern antireflection coating technology (UV 420) on the eagle eye Vision Contrast offers highest contrast boost while keeping a constant 99.8 % blooming. The Vision Contrast blocks the blue share of the light, meaning less stray light by explicit reduction of the blue share of the light. This, in turn, results in highest contrast increase. The Vision Contrast eagle eye works without eyesight 0.00 dpt and is therefore allowed for all sports shooters according to DSB regulations.

Item No.: 9513-00 (M18)

Item No.: 9505-00 (M22)

Eagle Eye Vision Contrast with Dioptrie

Item No.: 9513-V-03 /-05 /-075 (M18)

Item No.: 9505-V-03 /-05 /-075 (M22)

10

8 SPIRIT LEVEL

- Two sizes, M18 and M22.
- Adjustment without the need for tools.
- Exact reproduction of different tilt angles.

Delivery without front sight.

Item No.: 9503 (for M18 front sight)

Item No.: 9504 (for M22 front sight)

9 SPIRIT LEVEL

For checking tilt without changing the head position. The spirit level is fixed to the dovetail directly in front of the rear sight.

- Easy, continuous adjustment while in the shooting position by means of the knurled screw.
- Easy centering of the front sight, as the level is not visible in the target image.

Item No.: 9506

12

10 REAR SIGHT SPY SHORT

Precision rear sight in aluminium, includes anti-glare tube.

- Extremely narrow and compact.
- 24 clicks (0,02 mm per click).
- Wind flags can be observed without difficulty in the shooting position.

Please state the manufacturer of the target rifle.

Item No.: 9515 (for ANSCHÜTZ, Walther, FWB and Steyr)

Item No.: 9515-S (for ANSCHÜTZ, Walther, FWB and Steyr)

11 REAR SIGHT SPY LONG

Precision rear sight in aluminium, includes anti-glare tube.

- Extremely narrow and compact.
- 24 clicks (0,02 mm per click).
- Wind flags can be observed without difficulty in the shooting position.

Please state the manufacturer of the target rifle.

Item No.: 9513 (for ANSCHÜTZ, Walther, FWB and Steyr)

Item No.: 9513-S (for ANSCHÜTZ, Walther, FWB and Steyr)

14

12 DIOPTER SPY BR

Precision rear sight in aluminium, includes anti-glare tube.

- Extremely narrow and compact.
- 48 Clicks (0,01 mm over 10 meter per click).
- Long guide, blue knob.
- Approx. 130 g.

Item No.: 9512

Item No.: 9512 F

Item No.: 9512 W

13

13 SPY CROMO

- Chassis is made from stainless steel.
- height adjustment tower is made of titanium.
- Includes anti-glare tube.
- 24 clicks (0.02 mm per click).
- 0.2 mm per click at 10 m.
- 1 mm per click at 50 m.

Item No.: 9535

14 Iris disc TINY

- Iris disc with integral 5-colour filter (grey, dark grey, c41 blue, yellow, peach).
- Extremely small size.
- Specially developed for the SPY rear sight and the SIGHT BASE 10-50.

Item No.: 9514

ACCESSORIES

1 Raiser Block - CLUB

- Height and laterally adjustable raiser block.
- Basic height 10 mm.
- Height variable in 4 mm steps up to 22 mm.
- Sighting line can be moved laterally by 4 mm in one step.
- Rear sight rail can be shifted back by 25 mm (Mini-tele).

Item No.: 6916 (For Match 54, 1407-1813)

Item No.: 6917 (For Walther rifles)

Item No.: 6918 (For FWB rifles)

Item No.: 6919 (For ANSCHÜTZ rifles Model 1903-9003)

2 Raiser Block - XXL

The 20 mm elevation offers advantages primarily in the standing and kneeling positions. The twisting of the head when sighting the target is reduced to a minimum, thus largely avoiding tension in the neck or back areas. The raiser block may be used for all air and small-bore rifle disciplines.

Item No.: 6922 (For ANSCHÜTZ rifles Model 1903-9003)

Item No.: 6921 (For FWB rifles)

Item No.: 6920 (For Walther rifles)

Item No.: 6922-U1

(suitable for all standard sporting rifles)

3 ahg - Anschütz quick fastener screw set for raiser block XXL

With this set all ahg-sight raiser blocks XXL (items 6920, 6921, 6922) can be altered very easily in order to mount or remove the raiser on the rifle without a tool. This is really essential in the finals of 3-position-competitions when quickness during the change of positions is a crucial factor.

Item No.: 6895

4 Raiser Block

- 100% fit.
- For ANSCHÜTZ Model 1903-2013.
- Only 4 mm high.

Item No.: 6923

5 Raiser block - TRACK

- Variable lateral adjustment.
- Elevation 9 mm.

Item No.: 6924 (For ANSCHÜTZ rifles)

Item No.: 6925 (For FWB rifles)

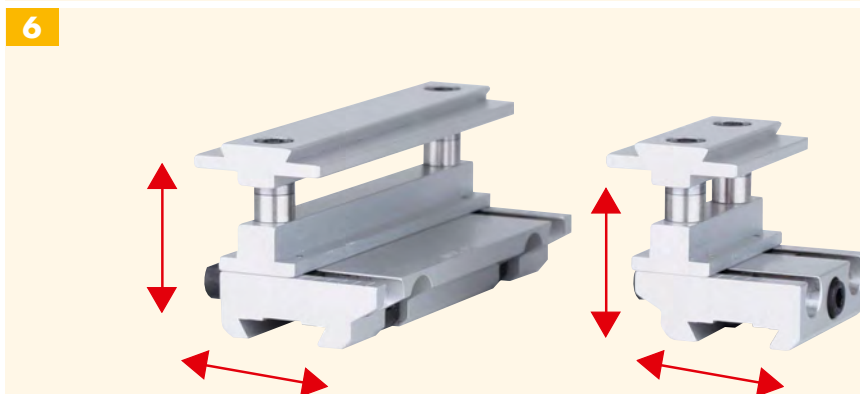

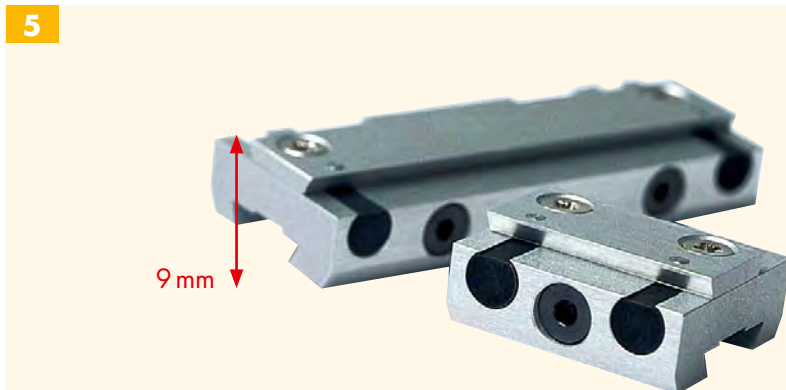

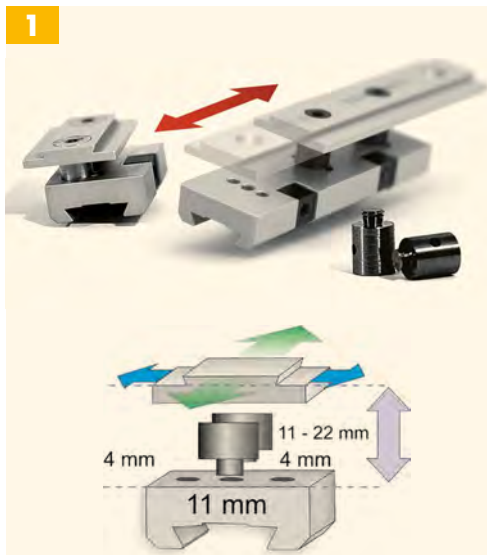

6 Raiser Block - TRACK MAX

With the TRACK MAX the sights can be moved laterally, thus optimizing the head position. The basic height is 22 mm. It can be extended to 27 mm in 1 mm steps. Continuous lateral movement up to 8 mm is possible. These individual adjustments allow an even more perfect adjustment of the sights, especially in the standing or kneeling position. Tension in the neck or back muscles can virtually be eliminated.

Item No.: 6926 (For ANSCHÜTZ rifles)

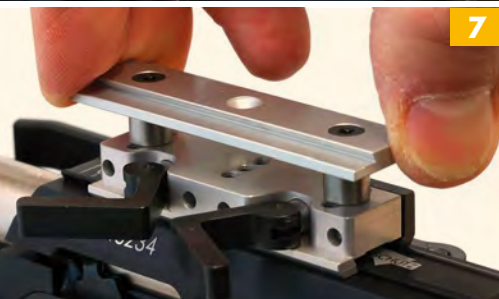

Item No.: 6926F (For FWB rifles)

Item No.: 6926W (For Walther rifles)

7

7

11

13

8

9

10

12

14

7 Block Club SR

Variable raiser block with „rapid-fix-system“.

- To mount quickly and safely with one hand.
- Tightening torque individually adjustable.
- Base height 11 mm.
- Vertical adjustment in increments up to final height of 24 mm.
- One horizontal offset out to 4 mm.
- Rear-sight-dovetailplate can shift 25 mm.

Item No.: 6915 (For ANSCHÜTZ rifles)

Item No.: 6915-F (For FWB rifles)

Item No.: 6915-W (For Walther rifles)

8 RUBBER EYESHADE for rear sight

Item No.: 9700

9 EYESHADE

- Fold-up eyeshade for the non-aiming eye.
- Rubberised clip for secure, non-slip clamping to all current spectacle frames.

Item No.: 9777-1 (white)

Item No.: 9777-2 (translucent)

Item No.: 9777-3 (black)

10 EYESHADE with iris disc

- Fold-up eyeshade.
- Adjustable iris disc.
- Rubberised clip for secure, non-slip clamping to all current spectacle frames.

Item No.: 9778

11 EYESHIELD for sight disc aperture

- In Sikolex or Lexan.
- Is simply pushed on to the iris aperture disc to cover the non-aiming eye.
- The eyeshield can be individually cut to size.

Item No.: 9776-1 (white)

Item No.: 9776-2 (translucent)

12 EYE SHIELD

The eye shield is simply put over the existing iris disc or sight disc aperture and covers the non-aiming eye. In order to find the best position of this shield for your shooting position, the ahg-cover shield can be turned 360° around the rubber eyeshade. The eye shield conforms to the rules of DSB and ISSF.

Item No.: 9492 (translucent)

Item No.: 9493 (black)

13 Strasser eye shield - SMALL

- Conforms to the new DSB and ISSF rule.

Item No.: 9494 (black)

Item No.: 9498 (white)

Item No.: 9499 (translucent)

14 Strasser eye shield - BIG

Item No.: 9500 (black)

Item No.: 9501 (white)

Item No.: 9502 (translucent)

ACCESSORIES

1 DUPLEXVARIO

This new version of the Duplex has the same X-Y adjustment but with an adjustable centering ring. Can accommodate the Duplex iris. Can accommodate a coloured filter lens 2 adjustment ranges available 3.4 - 4.4 and 3.8 - 4.8

Item No.: 9767-VS (3.4 - 4.4)

Item No.: 9767-VL (3.8 - 4.8)

2 DUPLEX Insert

The Duplex Insert is a ring similar to an aperture insert which, from an optical viewpoint, lies in the plane of the iris rear sight opening. This ring divides the halo between the iris rear sight opening and the front sight. The effect is a sharper image of the target and the recognition of aiming errors.

Available in hole sizes 3.8 to 4.6.

The position of the Duplex Insert is adjustable both laterally and in elevation by means of the X-Y adjusting unit, in order to centre the ring of the insert.

Item No.: 9768 (yellow)

Item No.: 9769 (clear)

3 DUPLEX Iris

The Duplex Iris provides containment and shadowing of the halo between the iris rear sight opening and the front sight. This facilitates the centring of the front sight in the iris rear sight opening for some sportsmen, aiming precision increases and older shooters can see the insert and target more sharply.

The position of the Duplex Iris is adjustable both laterally and in elevation by means of the X-Y adjusting unit, in order to centre the aperture of the Duplex Iris.

Item No.: 9770

4 COLIMATOR

Ball joint for the lens hood is required for aligning the anti-glare tube (lens hood) or the Duplex when the adjustment range of the Duplex is insufficient.

Item No.: 9785

SPY COLIMATOR

Anti-glare tube with integrated ball joint for Spy rear sight as a support element for the Duplex.

Item No.: 9785-U1 (not shown)

5 LENS HOOD ANS

- Anti-glare tube suitable for centra-sight-base, MEC free-sight and ANSCHÜTZ rear sights (6702/6802).
- Facility for mounting the following accessories: DUPLEX, LENS, LENS POL.

Item No.: 9772

LENS HOOD 7020, suitable for 7002 rear sight.

Item No.: 9771

LENS HOOD FWB, suitable for Feinwerkbau rear sight.

Item No.: 9774

correctly adjusted

APPLICATION EXAMPLES

6

6 MONOFRAME for 25 mm spectacle lens

Your individually corrected spectacle lens is clamped in the ahg-Monoframe. Using a thread adapter and a clamping block, the ahg-monoframe is mounted centrally in front of the rear sight or iris disc. Your sight defect is thus corrected directly at the iris disc and consequently aiming errors are avoided to a large extent. Only spectacle lenses with an outside diameter of 24 mm can be used.

- Item No.: 9450** (for all diopters)
Item No.: 9450 B/B (Busk/Busk)
Item No.: 9450 B/A (Busk/ANSCHÜTZ)
Item No.: 9450-U1 (Adapter screw)
Item No.: 9450-U2 (Holder for lens frame)
Item No.: 9450-U3 (Lens frame)

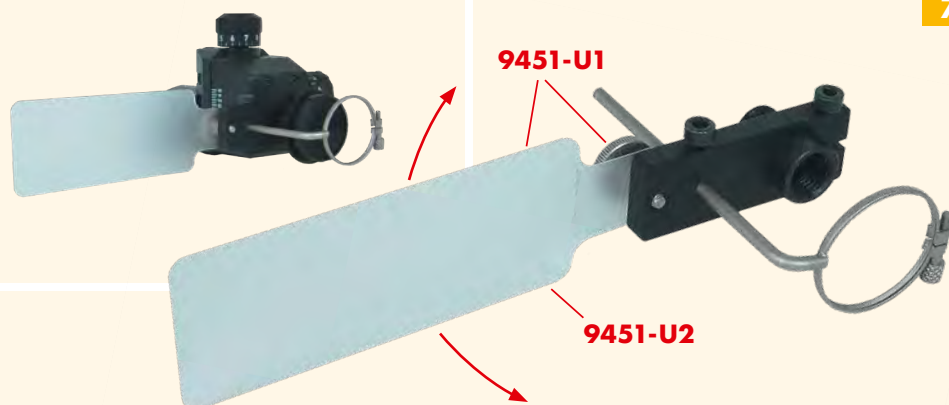

6

7 ahg-MONOFRAME Deluxe

The Monoframe Deluxe includes a side blinder made of lexan to cover the not aiming eye. The blinder can be adjusted in angle with a stainless steel setscrew. For 25 mm Spectacle Lens. Your individual, improved spectacle lens is put in the ahg-monoframe. With the help of a set adapter and a clamp, the ahg-monoframe is mounted centrally in front of the sight disc or the iris disc. Therefore, your sight defect is corrected directly on the iris disc, consequently aiming mistakes are avoided to a large extent. Only spectacle lenses with an outer diameter of 24 mm can be used.

- Item No.: 9451**
Item No.: 9451-U1 (side blinder with screw)
Item No.: 9451-U2 (side blinder)

7

8

8 MEC glas Monocle

- Shooting glass on the rear-sight.
- The Monocle allows mounting already correction glas to your rear-sight.
- You are able to adjust the distance to the eye.
- The exact fit in the center of the sighting line promises many advantages.

Item No.: 5015532 (lens holder 23 mm)

9

9 MEC glas Monocle Revolve

- With 360 degrees rotation, the glas position is perfectly adjustable.
- Setting at any time without tool.
- Small, lightweight, can be retrofitted.

Item No.: 5028267 (lens holder 23 mm)

RIFLESCOPE KK50

1

1 Rifle scope Anschütz KK50 4-12x44 AO

- Fully multi-coated optics for maximum clarity
- 1" matte black anti-glare body tube
- $\frac{1}{8}$ M.O.A BDC turrets for accurate adjustment, 1,82 mm per click at 50m
- Adjustable objective for parallax free shooting
- Maximum adjustment horizontal and vertical 90 M.O. A
- eye relief 89 mm at x 4 and 76 mm at x 12
- Incl. high mounts for 11 mm prism
- Length 336 mm weight 648 g .
- Reticle KK50
- Adjustable objective – 10m to infinity
- FOV 10 m at 100 m with x4
- Waterproof, Shockproof and Fog Proof
- Protective lens caps
- Hawke 10 year Warranty

Item No.: HK3026

2 Sight offset for the "ZF-Plus" rifle scope

- The weapon can be held straight.
- No tilting of the sporting equipment.
- Sporting equipment and head remain in the center of gravity.
- Suitable for both right-handed and left-handed shooters.
- Adjustable in four different stages 5mm/10mm/15mm/20mm.
- Guaranteed stability thanks to fitting pins – anti-rotation device.

Item No.: 455

3 ahg shooting glasses Classic

The ahg shooting glasses have a fine adjustment by knurled nut for easy adjustment of the lens frame and eye shield to the right or left. The nose bridge and the eye shield can be adjusted in height by knurled screw. The ear bows are equipped with a spring hinge to improve the wearing comfort.

Item No.: 8900-24 (Set with lens frame 24 mm)
 Item No.: 8900-37 (Set with lens frame 37 mm)
 Item No.: 8900-42 (Set with lens frame 42 mm)

Item No.: 8914-42 (Movable Iris for lens frame 42 mm, single)

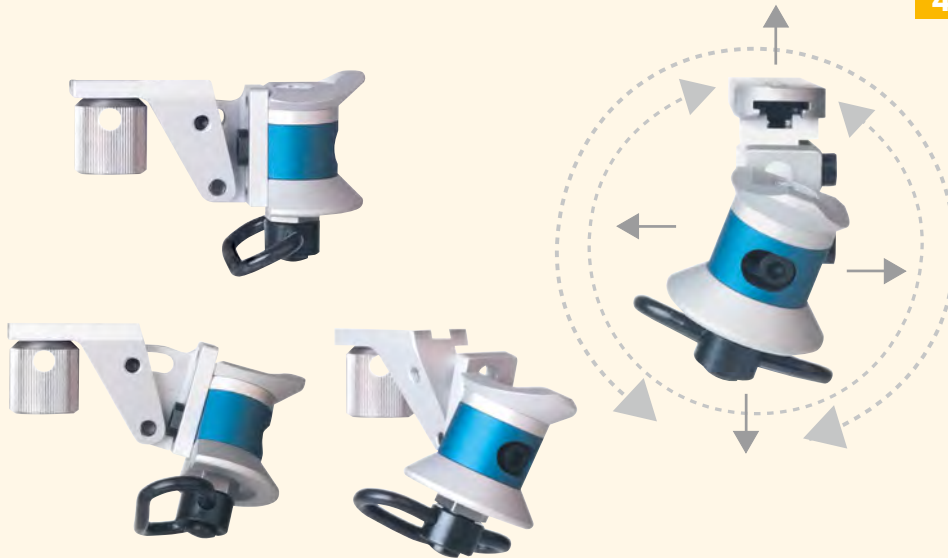

2 NEW!

2

4

4 HAND STOP - INTEGRAL

You need the right equipment for a successful competition. The ergonomic, ideally designed ahg INTEGRAL HAND STOP can make a significant contribution towards bringing out your best performance. The handstop is adjustable in all directions and adapts to your shooting hand without compromise. Individual adjustments to the hand stop (horizontal, vertical, axial and radial) distribute the high forces that are transmitted from your target sling to your hand. The concentration required for a precise shot will no longer be disturbed by an aching hand.

Item No.: 6229

5

5 HAND STOP with sling swivel

The sling swivel stud is detachable and can remain on the target sling.

Item No.: 6226-1 (silver)

Item No.: 6226-3 (blue)

6

6 HAND STOP ahg-Deluxe

Ergonomically formed handstop with ball head sling swivel. The swivel stud is detachable from the revolving coupling cylinder in the handstop. The ergonomic form of the stop cylinder and the turnable coupling provide automatically an ideal distribution of the force of the sling on the back of the hand. This handstop can be clamped without tools.

Item No.: 6224 (silver)

7 HAND STOP - SMALL with sling swivel

The sling swivel stud is detachable and can remain on the target sling.

Item No.: 6225

7

8

8 SLING SWIVEL with push button

Suitable for hand stops 6225, 6226, 6227, 6229 and 4572.

Item No.: 6226-13

9

9 SLING SWIVEL 4733-10

Suitable for hand stop 6224.

Item No.: 016694

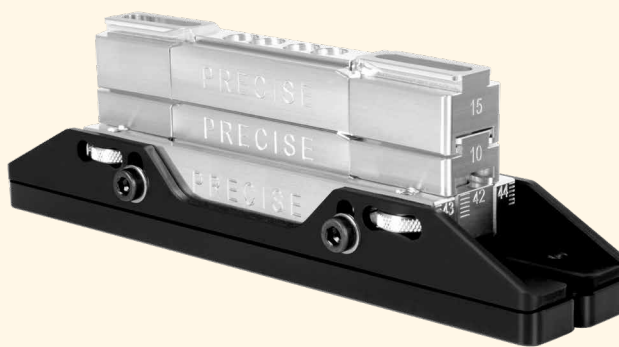

1 Forend raiser block Precise PLUS

A new forend raiser with unmatched adjustment possibilities. This carrier's core is made from aluminum and offers 5 individual snap and/or thread adjustments. The forend raiser block Precise PLUS simply slides into the stock and is fastened in the required position. Both resting surfaces are made from plastic and are fixed on the alu carrier with an angle bracket and therefore can be adjusted individually in height, width and angle in order to adjust the contact to the supporting hand. This is especially important if the stock rests on the palm of the shooter's hand. Minimum height of 23 mm can be expanded steplessly to a maximum of 37 mm. Two additional spacers of 10 and 15 mm can be expanded the forend raiser block to a maximum of 67 mm. Minimum width of 36 mm can be expanded to a maximum of 68 mm.

Item No.: 1010

Item No.: 1022 (Distance spacer set, 9 mm)

1

Distance spacer set, 9 mm
Item No.: 1022

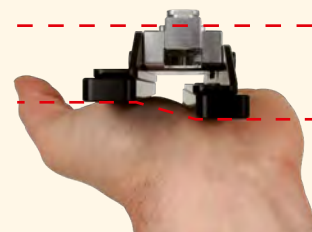

2 ahg - palm rest PILLAR

ahg-palm rest Pillar unites many advantages. A staged plastic support offers many different positions of the palm, a well-thought-out adjustment unit optimizes the position. The basic height of 36 mm can be raised in 2 mm steps up to 54 mm. If this height is not sufficient, two 5 mm raisers - also supplied - can be used additionally. More 5 mm raisers are available as additional accessory - only 5 mm longer screws are subsequently required. ahg-palm rest Pillar can also be rotated infinitely side-ways and adjusted repeatedly by means of a scale. This plastic palm rest can be mounted at the basis in various positions, same applies for the sliding block which is pushed into the UIT rail. This offers numerous positions of the palm rest.

- Length 160 mm
- Basic height 36 mm
- Weight 250 g

Item No.: 9799

2

3 Cheek piece DoubleFit

- Two contact surfaces (zygomatic bone & upper jaw) ensure precise reproducibility.
- Fast and precise acquisition of the target.
- Parallax error is effectively minimized.
- Suitable for both right and left-handed shooters.
- The support surfaces can be rotated through 360°.
- The support surfaces offer two different surfaces/edges.
- ISSF approved.
- Mounting is simple and can be done by any shooter.

If you own an Anschütz One or Steyr Challenger, you will also need a mounting kit. This is available separately.

Item No.: 9810 (Length 130 mm, Weight 140 g)

Item No.: 9811 (Length 180 mm, Weight 150 g)

3

NEW!

Item No.: 9810

Item No.: 9811

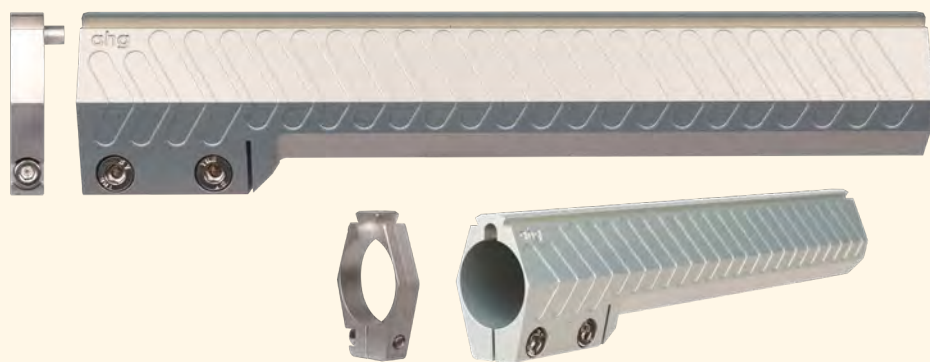

4 Mounting kit for butt plate DoubleFit

Mounting kit for butt plate DoubleFit 9810/9811 for rifle Anschütz One or Steyr Challenger.

Item No.: 9812

5

5 ahg-ANSCHÜTZ barrel extension

Made from high-strength aluminum and naturally anodized, this ahg-tube extends the sighting line by 157 mm. The weight of 163 g optimized the muzzle inertia during shot release and also allows more added weights to balance the sporting rifle ideally.

A center ring with an integrated positioning pin is supplied which allows a repeatedly exact mounting and demounting of the barrel extension. This tube should be cleaned after each shooting heat in order to avoid oxidation and guarantee optimum operation.

The robust clamp made from stainless steel threaded nuts and cylinder screws ensures best functioning.

The ahg-barrel extension is especially crafted with an inner diameter of 25.65 mm, accurately fitting all 1913 as well as 2013/690 ANSCHÜTZ models.

Item No.: 4518

6

6 Muzzle tube TENMINATOR

The extension of the sights by approx. 250 mm guarantees precise aiming and an improved depth of field of the whole target image, especially when shooting in the prone position. The additional weight of approx. 270 g, increases the muzzle inertia during firing and thus stabilises the rifle in the shooting position.

The newly developed muzzle coupling can be adjusted to the diameter of the barrel and allows a stable and secure fastening of the muzzle tube from 21 to 26 mm. Fitting to all current match rifles is therefore possible.

The muzzle tube can be dismounted for cleaning and transport by loosening the clamping screws. An 8 mm raiser block, which is required for the rear sight, is not supplied. Muzzle tube with adjustable clamping muzzle coupling.

Item No.: 4514

NEW!

7

7 ALUMINUM MINI TORQUE WRENCH SET

- Reversible torque wrench for bi-directional tightening.
- Hex drive for the bit, square drive for the socket.
- The quick release function is for square drive only.
- Easily readable window scale.
- Additional micrometer scale for setting interim value.
- Non-slip handle design with automatic rebound function enables reliable locking of the torque setting.
- Tolerance of torque $\pm 4\%$, Adjustment range 3 – 16 Nm
- Quality meets DIN ISO 6789 & ASME B107.300-2010.
- Incl. bits: H 3,4,5,6,8,10, T 10,15,20,25,30, SL 3,4,5,5.5,6, PH 0,1,2,3
- 1/4" bit holder, 1/4" socket extension

Item No.: 4507

8

9

10

8 TORQUE WRENCH

New design helps to ensure a constant torque when tightening the stock set screws of target rifles. Adjustment range of 4 – 12 Nm.

Item No.: 4506-SW4 (incl. 4 mm insert)

Item No.: 4506-SW5 (incl. 5 mm insert)

9 INSERTS FOR ITEM 4506

Item No.: 4505-1 (4 mm)

Item No.: 4505-2 (5 mm)

10 UNI TOOL

Includes all the important Allen key sizes and a screwdriver as needed for adjusting screws on the rifle. Sizes 2,0 mm; 2,5 mm; 3 mm und 4 mm.

Item No.: 1200

ACCESSORIES

1 BI-POD

The bi-pod ensures that the rifle is set down safely when preparing for a competition. The wide spacing of the balls gives the weapon a secure position when set down. The two supports can be folded in to save space during transport.

Item No.: 9793

2 Bipod PRECISE

Push the button and the feet will simply retract. Safe deposition of the rifle before, during and after competition.

Weight: 108 g

Item No.: 9796

3 Bipod FREE

No vibration thanks to spring technique. Safe de-position of the rifle before, during and after competition. The basic body is formed from hard plastic, therefore small total weight of only 95 g.

Item No.: 9794

4 ahg-BARREL WEIGHT

Weight: 200 g

For diameter 20 – 22,5 mm.

e.g. for ANSCHÜTZ Mod. 1407–1907,
felt stripes avoid scratches.

Item No.: 8007

5 Trigger shoe Point

- Infinitely adjustable in height.
- Trigger ball continuously rotatable by 360°.
- Trigger blade continuously adjustable in length.
- Can be used as pointed or fluted ball.
- For Anschütz trigger 5018/5071 and 5065.

Item No.: 9713

6 TRIGGER SHOE

For ANSCHÜTZ triggers 5018/5071.

- Constant finger position.
- Variable height adjustment.
- 360° rotating trigger ball.
- Variable length adjustment of trigger blade.
(can be adjusted further forward than the original blade).

Item No.: 9717

7 Trigger shoe SENSIVE II for air rifles and pistols

- Stepless adjustable in all directions because of ball joint.
- Ergonomic formed finger plate.
- Weight 6 g.

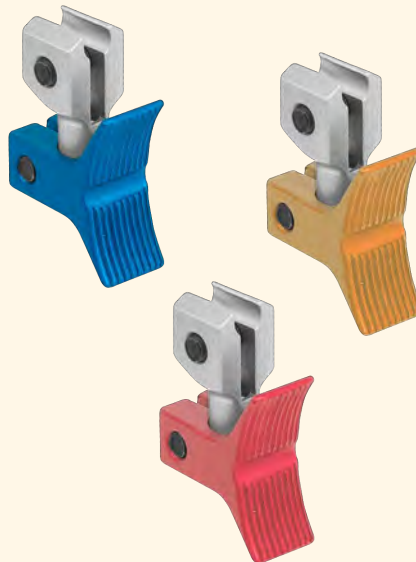

Item No.: 9712-S (for Steyr - silver)

Item No.: 9712-M (for Morini - gold)

8

9

8 Trigger Shoe SENSIVE

Trigger Shoe SENSIVE sets standards in regard to trigger blades. Two patented ball-joints enable the trigger blade to be adjusted infinitely in all directions. The actual trigger blade can be put in every position imaginable by TWO ball-joints in order to achieve the best grip and feeling for the shooter. This is required for tension-free handling. Both turning points are supported by an ingenious threaded cocking pin. The trigger blade with integrated grip has the ergonomic form of the trigger finger, enabling the shooter to find the exact same position of the finger again for each shot without any help. Fastening of the trigger shoe SENSIVE is done by rails, which permit the use of ONE trigger for all firearm brands.

ACCESSORIES

1 Air rifle butt plate MASTER

Patented system for self-adjustment and pressure distribution. Five individual support elements, infinitely adjustable in all directions, guarantee the perfect fit for every shoulder. Rubberized anti-slip surfaces noticeably cushion recoil and hold the rifle securely in the stock. The narrow fit width of the upper contact element of only 18 mm as well as the lower one of only 8 mm are perfectly balanced. Each individual contact surface (contact element) is mounted on a ball and can therefore move freely in all directions. The individual contact elements can then be fixed as required. The base plate for mounting the aluminum cap on the butt plate cantilever is provided with a scale for repeatable and reproducible height adjustment. The upper and lower angle setting can be adjusted after opening the fixing screw by means of a fine adjustment screw and reproduced with repeat accuracy using the scale.

Technical data:

Width: 25 mm

Weight: 290 g

Material: Rubber/aluminum

Item No.: 4764

2 FOAM RUBBER for cheek piece

Ensures perfect grip in position.

Item No.: 4819

3 Hook butt plate ERGONOMIC

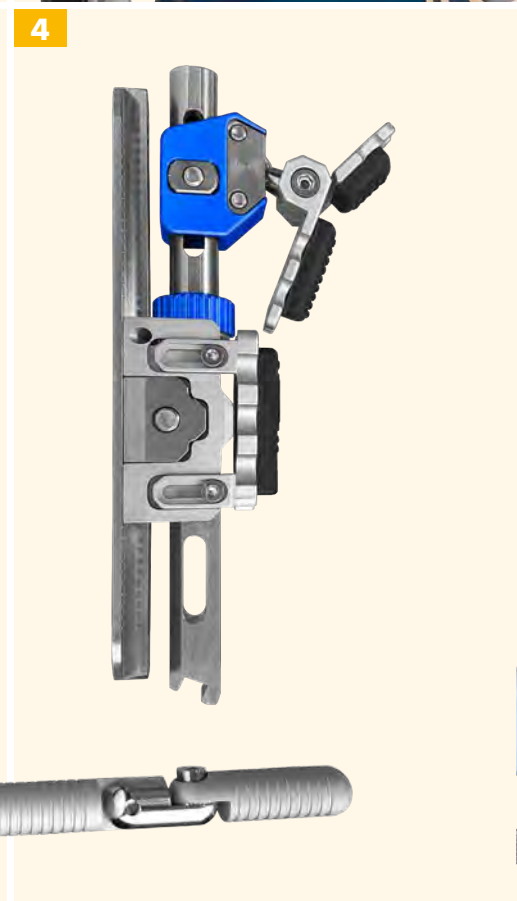

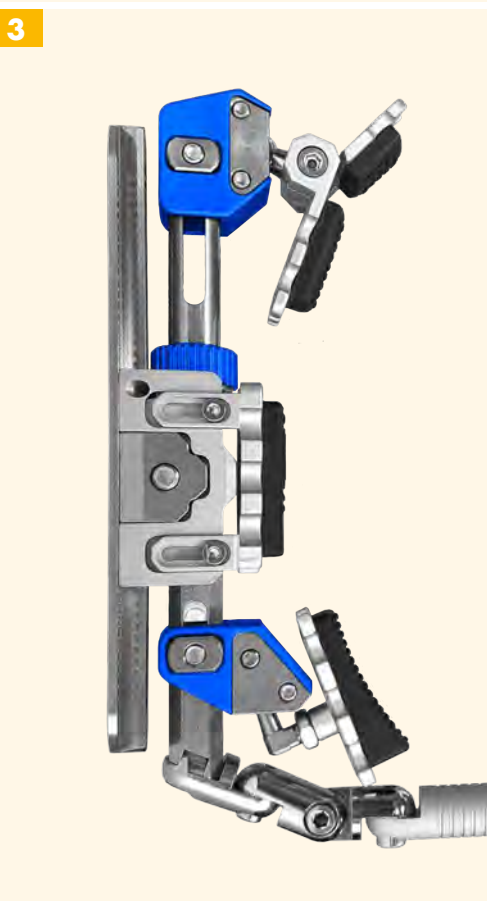

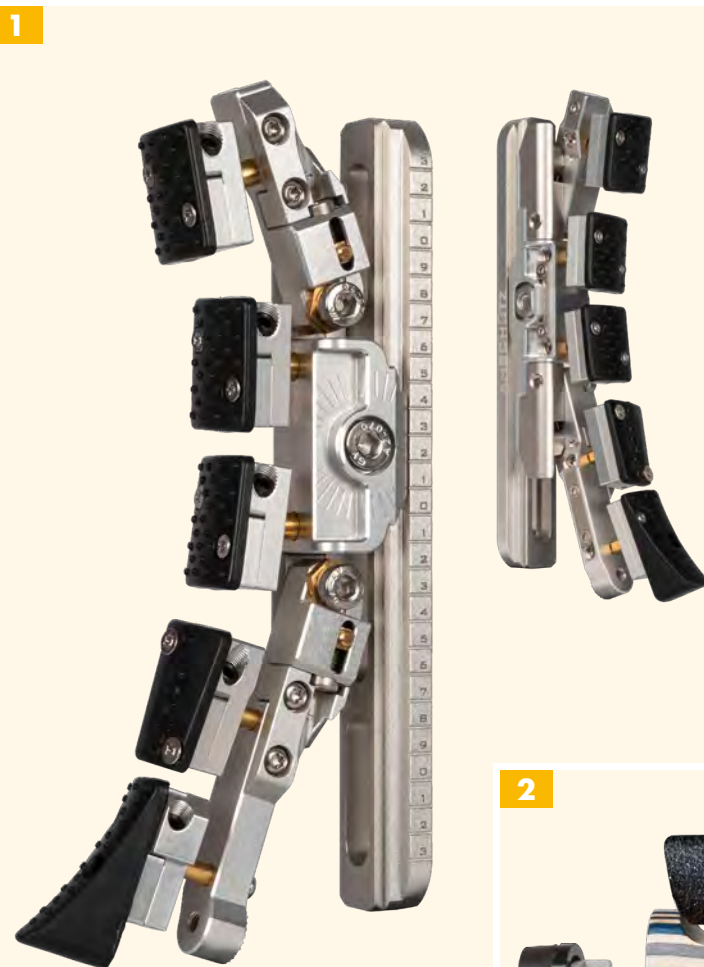

A butt plate modified to small bore and big bore shooting requirements. Stability despite of versatile adjustment possibilities unified with sophisticated design. Universal joints offer stepless adjusting and three independently adjustable plates with rubber - a harmonic development of design and operation. The contact of shoulder and butt plate Ergonomic is ideally supported by a rubber layer on the alu parts. Releasing the shot gives a very comfortable and uniform feeling. The perforated rubber and the revolvingly perforated alu wings provide an absolutely anti-slip connection of the shoulder and butt plate Ergonomic. The butt plate hook is made from a combination of alu and steel, can be rastered in fine stages and stays safely in the adjusted position by the set toothing. A market newcomer is the upper wing - equipped with a rasterized double joint - offering adjustment above and on the shoulder. Due to the stainless steel screw-on plate the butt plate Ergonomic can be mounted to all current match stocks. This plate can be adjusted in height in 5mm grids. The fine height adjustment works stepless with hand wheels.

Item No.: 4775

4 BENCHREST butt plate ERGONOMIC

Like butt plate Ergonomic (Item No.: 4775), but without hook and lower adjustment plate.

Item No.: 4776

5

5 Hook butt plate RETRO

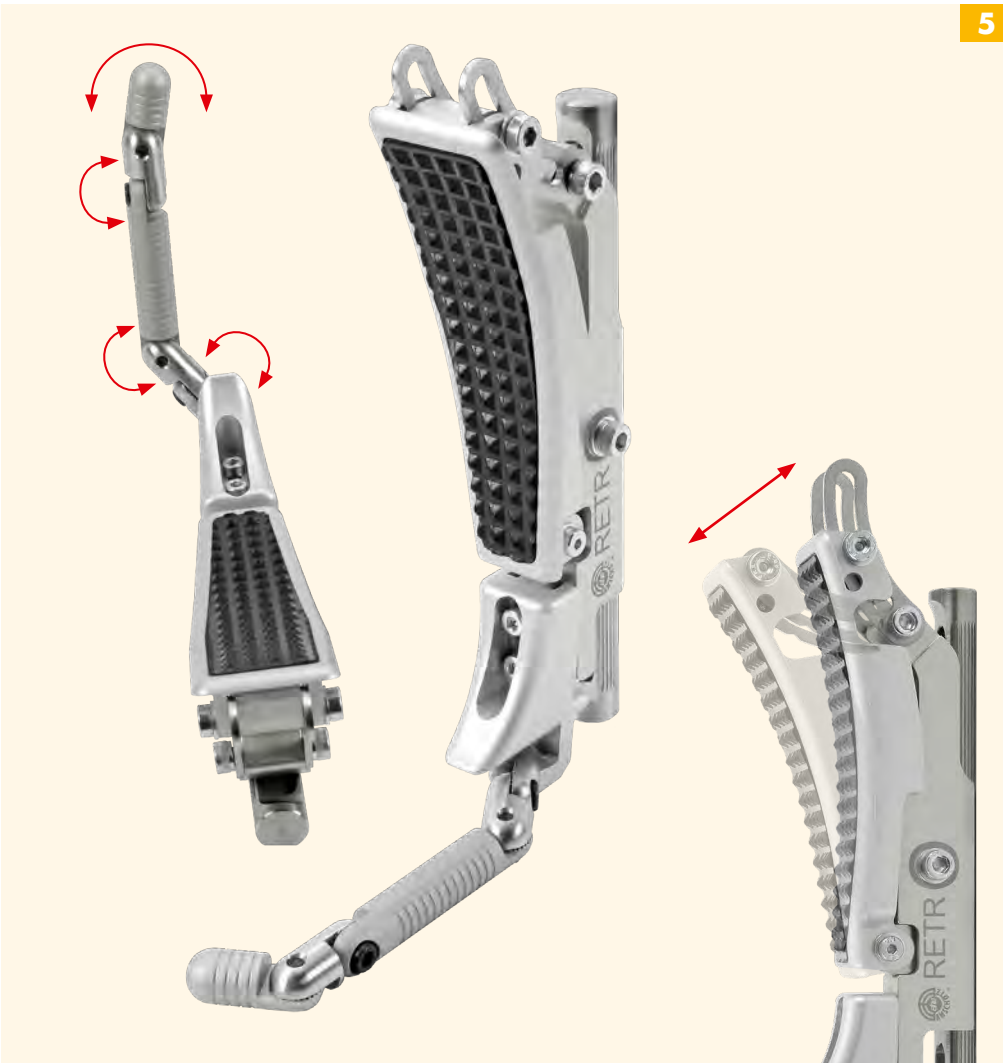

The ANSCHÜTZ hook butt RETRO mod. 4762 is a very well-known accessory for rifle shooters. Due to the demand from shooters, we have revived it with new design in technique and material. This product is 100% made in Germany and extremely strong and supreme in small and big bore shooting. Fine adjustment of the incline results in a perfect fit to the shoulder. A highlight is the new construction of the hook. It allows the pure sideways swap of the hook which results in a perfect positioning of the rear stock vertically underneath the shooter's head. The essential advantage is shown at the moment of the shot: distinctly more control and a more constant diversion of the recoil of the rifle. The rubberized contact area offers best grip between shoulder and hook butt avoiding sliding. This simple but thought-out hook butt impresses by inter-coordinated materials, not only in appearance but also in function and practice.

Item No.: 4762

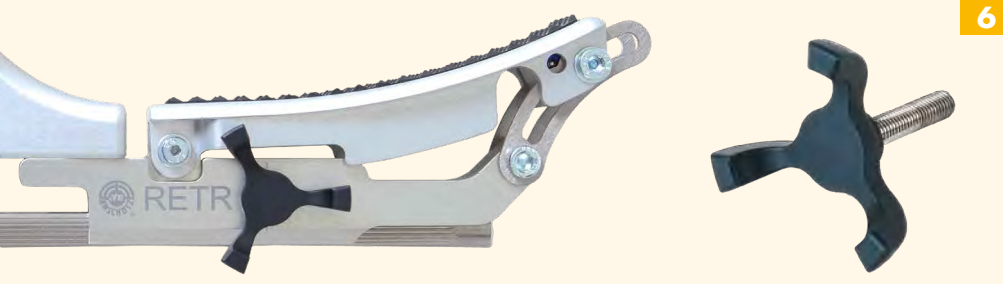

6 ahg-clamp fast clamping screw for hook butt plate

Drastically reduced shooting times - not only in the finals but in competitions generally - call for ahg-clamp fast clamping screw for hook butt plate short adjustment periods when changing shooting positions. In order to save time and keep cool it is essential to cut down professionally on time and handling. The new ahg-clamp makes all this possible. Ergonomically wings offer a quick and effortless loosening and tightening of the screws without additional tools. Using the ahg-clamp you can adjust the hook butt or cheek piece even when in position quite easily in height, depth or angle.

Item No.: 4767 (Fast clamp device for hook butt plate 4762 und 001119)

6

MEC ACCESSORIES

1 MEC "TRIGGER" TRIGGER SHOE

- Can be tilted to the side.
- Blade can be moved freely.
- Longitudinal grooves for secure grip.
- Optimum width.
- Variable rings for sensing height.
- Light aluminium construction for function and stable fixing.

Item No.: 9906 (for ANSCHÜTZ)

Item No.: 9907 (for FWB)

Item No.: 9908 (for Walther)

2

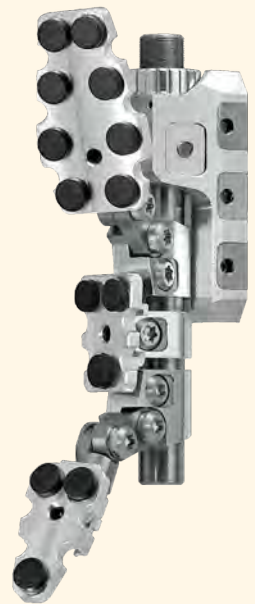

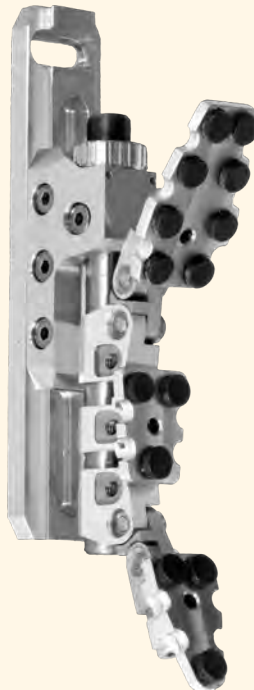

2 MEC HAND STOP

- Can be moved to the side, i.e. the hand can be individually positioned on the stock.
- Variable height. The height can be adjusted to suit the anatomy of a particular hand by using spacers.
- The special shape minimises pain.
- There are two options for attaching the sling swivel: the sling pull can come from the centre (fixed to the knurled screw) or it can come proportional to the lateral offset, not from the centre (fixed to the "bobbin").
- Scaling of the lateral offset.

Item No.: 6227

3

3 MEC „CONTACT IV“

The classic has been modified to fit the new generation.

- A hand adjustable screw enables vernier height adjustment.
- Additional joints allow for variable adjustments.
- Wing forms are exchangeable.
- Wings are fully adjustable and revolvable.
- The natural uncured rubber knobs allow for perfect grip.
- Compatible with all common match rifles.
- Suitable for the following disciplines: offhand air rifle, 3-position and shooting air rifle off a rest.

Item No.: 9913

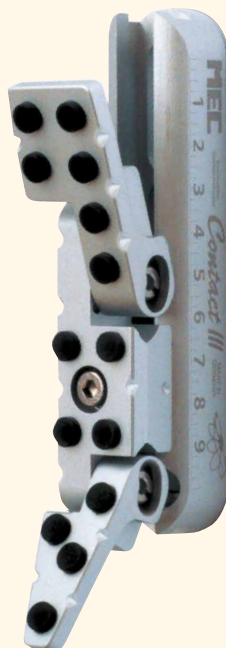

4 MEC "CONTACT III"

Aluminium butt plate.

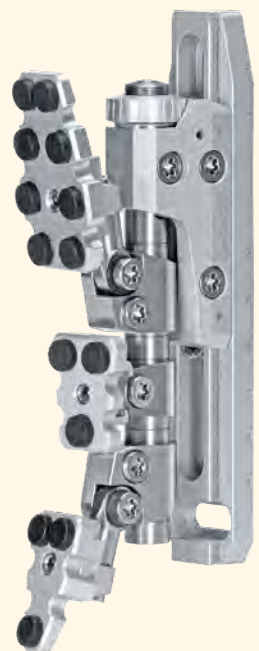

- Continuous adjustment to any shooting position.
- Very good grip.
- Fits all current air rifles.

Item No.: 9903

4

5

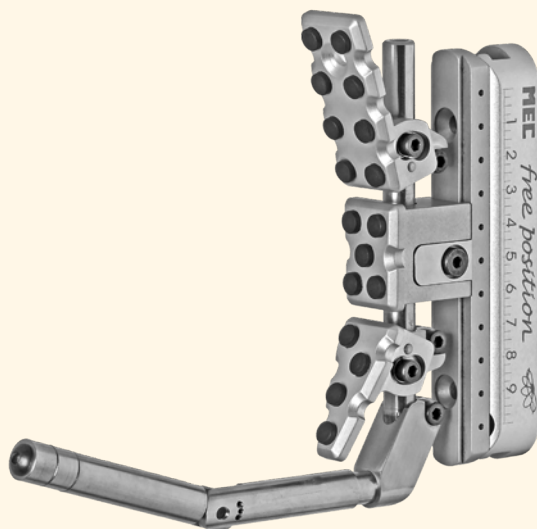

5 MEC „CONTACT IV LIGHT“

Reduce to the max. Compared to the Contact IV, the light version dispenses with the double joints. This greatly simplifies handling without significantly limiting the range of adjustability.

- Fine-tuning the height adjustment with a hand-operated screw.
- Diverse adjustability options.
- Interchangeable wings.
- Perfect adhesion thanks to natural rubber knobs.
- Can be enhanced, e.g. with the "CIV full package".

Item No.: 9914

6

6 MEC „Free Position II“

Butt plate for Super-Match and sport guns.

- Uncountable possibilities of variation.
- Improved shape with grooving.
- Steel wing holders.
- Improved centre block.
- Wing elements allow it to be placed up high, at an angle and rotate round the axle.
- Fits all current small bore sport rifles.

Item No.: 9904-U1

7 MEC Contact III Plus

The MEC Contact III Plus is the further development of the proven Contact III and combines a compact design with maximum adjustability. Its slim construction integrates harmoniously into the stock and offers shooters the greatest possible freedom of movement.

The individually adjustable wings allow precise adaptation to the shoulder, while the fine height adjustment ensures exact positioning. Thanks to the option of setting the butt plate very low, the Contact III Plus is particularly designed to meet the requirements of modern shooting positions as well as for benchrest shooters.

Item No.: 9909

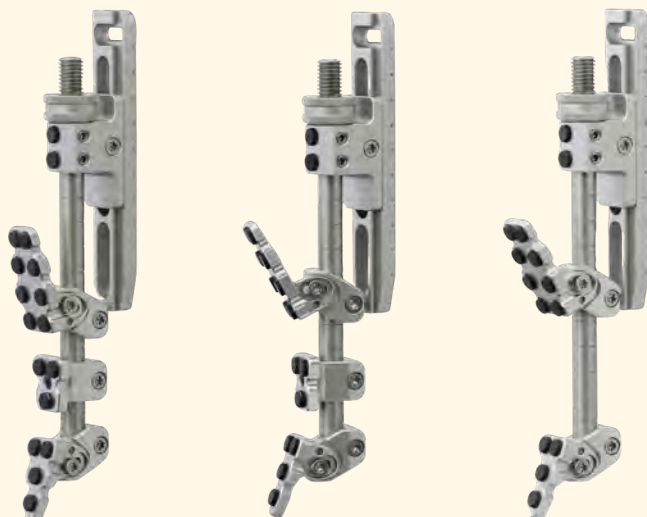

8 Contact-Element for ANSCHÜTZ-Air-Rifle „ONE“

- Integrated double joint for individual adjustments.
- Interchangeable contact surfaces.

Item No.: 5034734 (top)

Item No.: 5034735 (middle)

Item No.: 5034736 (bottom)

7

9 MEC Trigger III

Trigger blade with individually definable contour.

- Variable contour through individually adjustable contact surface
- New, individual clamping system for adapters from 3 mm to 4 mm
- Allows completely free movement of the contact surface.

Item No.: 9921

8

Item No.: 5034734
(top)

Item No.:
5034735
(middle)

Item No.: 5034736
(bottom)

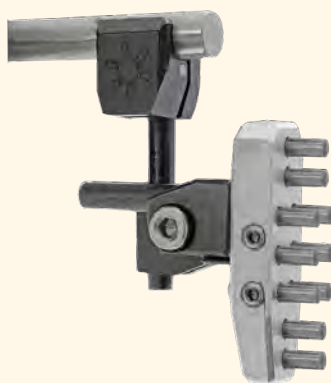

9

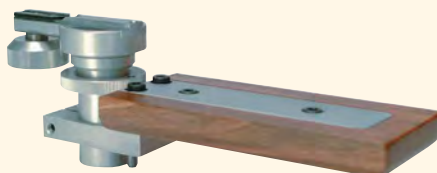

10 Palm rest - CHAMPION

- Adjustable in all directions.
- Exchangeable hand rest.
- Hand rest swings radially about the centre line of the barrel.

Item No.: 9910

10

7 MEC "VISOR"

- Neoprene eyeshield.
- Lightweight shielding from scattered light.
- Can be shaped as desired.

Item No.: 9905

LITERATURE

1 TRAININGSBUDDY

The Training Buddy is a creative collection of target shooting training exercises. For the amateur shooter - and the world-class athlete. Inspired by strong-willed and future-oriented shooters, it should support and motivate the training to be varied in order to get the best out of the shooter.

Item No.: 9922E-R (english, Air rifle)

Item No.: 9922E-P (english, Air pistol)

Item No.: 9922F-R (french, Air rifle)

Item No.: 9922F-P (french, Air pistol)

2 MENTAL TRAINING IN SHOOTING

Over 144 pages, successful coach Anne-Grethe Jeppesen and psychologist Anne Marte Pensgaard explain the importance of mental strength during competition and give advice on how to acquire it. The book is only available in English.

Item No.: 9915E (English)

3 AIR RIFLE SHOOTING

Item No.: 9912 (German)

Item No.: 9912E (English)

4 Rifle Training

Reference book for shooters. Volume 1.

Item No.: 9911 (German)

Item No.: 9911E (English)

5 PISTOL SHOOTING

Reference book for pistol shooters.

Item No.: 9916E (English)

6 OLYMPIC RIFLE SHOOTING

A total of 300 pages packed with more than 2000 pictures and graphics, exercises and suggestions for personalized training planning. More than 500 integrated videos and other resources are designed for shooters of all abilities and their coaches.

The reference work on rifle shooting today: Technique, tactics, equipment, psychology, science, training planning – everything you need to know about kneeling, prone and standing shooting with the smallbore and air rifle. 2025 edition.

Item No.: 9924E (English)

7 INSIGHTS

This book is based on these three pillars. Inspiring stories from shooting and archery offer an exceptionally deep insight into the inner life of champions. What happens in your mind when you become an Olympic champion? How do you master challenging situations? And what tricks do athletes use to keep their nerve? Olympic, world and European champions tell their exciting stories.

A book for trainers, athletes and sports enthusiasts full of practical inspiration, scientifically sound know-how, psychological exercises and food for thought. 350 pages

Item No.: 9923E (English)

8 TRAINING LOG FOR SHOOTERS

Exercise diary for shooters.

Only available in English language

9 Safety Cord - SIGNAL LINE

ahg is offering the SIGNAL LINE safety cord (approved by the DSB), which can be used with all calibres.

The red signal cord is passed through the chamber into the barrel of the rifle or pistol and pulled through the muzzle, thus indicating that the firearm cannot be loaded. We supply the safety cord in individual packs of 1 m, and also in packs of 10 m, so that you can cut up the cord yourself.

Item No.: 1400 (1 m)

Item No.: 1401 (10 m)

10 BOLT PROTECTOR

The BOLT PROTECTOR is made of special plastic and protects the bolt during transport from damage and dirt that could cause malfunctions.

For safety reasons, the bolt should always be transported separately and unlocked from the rifle. Most transport companies, including airlines, already stipulate by law the separate transport of rifle and bolt.

The ahg Bolt Protector has been developed to protect the bolt from damage and malfunctions while being transported separately.

The ahg BOLT PROTECTOR consists of a plastic sleeve with an integral guide for the bolt and a removable aluminium cap for easy cleaning of the sleeve. The bolt is inserted into the protector in the cocked state and positioned on the guide at the same time. Turning the bolt handle locks the bolt in the protector and automatically uncocks the firing pin or the firing pin spring.

For all ANSCHÜTZ match rifles, Models 1407–2013 and 54.30.

Item No.: 1322

Item No.: 1322-L (left-handed version)

11 BOLT PROTECTOR 1761

For bolt of Anschütz mod. 1761

Item No.: 1323

12 BOLT PROTECTOR 54.30

For bolt of Anschütz mod. 54.30

Item No.: 1324

13 Single shot adapter 1761

Single shot adapter for Anschütz Mod. 1761 cal. .22l.r. (does not fit the 1761 APR models)

Item No.: 1327

14 SAFETY LOOK

Safety first!

- Plastic cartridge with signal flag.
- Indicates that there is no live cartridge in the chamber.
- Prevents cooling of the barrel.

Available in the following calibres:

Item No.: 1300	Safety look for cal. .22 l.r.
Item No.: 1301	Safety look for air rifles and pistols
Item No.: 1302	Safety look for cal. .32
Item No.: 1303	Safety look for cal. .38/.357

Item No.: 1310	Safety look for pellet cal. 12
Item No.: 1311	Safety look for cal. 9 mm para

BENCH REST ACCESSORIES

1 Rear sight rail - TELE

To move the rear sight back for bench rest shooting.

Item No.: 1003 (for ANSCHÜTZ rifle, Walther)
Item No.: 1004 (For FWB rifles)

2 REAR SIGHT TUBE

To move rear sight iris apertures back:

The ahg rear sight tube is available in 30 and 50 mm lengths. They can be screwed into any standard rear sight and thus extend the iris to the rear so that the shooter can adopt a more comfortable, relaxed head posture when bench rest shooting. Because they are threaded, the individual tubes can also be combined with one another to produce various length combinations.

Item No.: 9773-30 (30 mm)

Item No.: 9773-50 (50 mm)

3 SIGHTING LINE EXTENSION

for bench rest shooting

An optimum combination of sighting line extension and raiser block, specially developed for bench rest shooting. The benchrest shooter looks through the sight set in a completely different way. Due to the displacement to the rear and upwards it is possible to adapt to the different shooting positions without compromise. 200 mm.

For Models 1907, 8002 and later.

Item No.: 007065

For Models 1407–1813 (not shown)

Item No.: 008551

4 BENCH REST WEDGE

For ANSCHÜTZ and FWB air rifles with a sloping fore-end. Simply push it into the aluminum swivel rail and screw tight.

Item No.: 1005 (hardwood)

Item No.: 1006 (black hardwood)

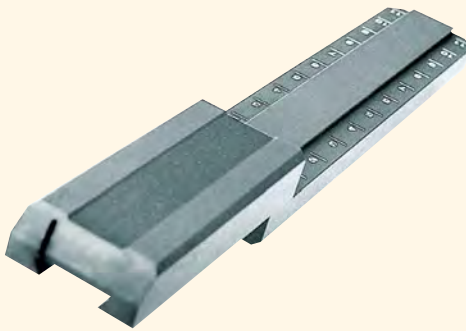

5 BENCHREST CHAIR

WITH ADJUSTABLE FEET

- Sturdy yet very light support stool made of aluminum.
- Weighs only 3.5 kg.
- The height is infinitely adjustable from 42 cm to 54 cm without adjustable feet and 46 cm to 58 cm with adjustable feet.
- Three-sided wooden seat for a comfortable sitting position.
- Maximum depth 33cm, maximum width 37cm.
- The tripod is foldable and the seat can be removed with a quick-release lever for space-saving transportation.

Item No.: 1037

BENCH REST ACCESSORIES

6

6 ANGLE PLATE for the bench rest wedge CONTACT

Some bench rest shooters prefer to tilt the rifle in the shooting position to achieve better seating of the butt plate in the shoulder area. To enable this individual fine tuning the angle plate, Item 1024 has been developed as an additional accessory for the bench rest wedge, Item 1023. When the aluminium angle plate is used, the rifle is tilted on the bench rest by 10° along the axis of firing and guarantees the shooter a tension-free, precisely repeatable shooting position. Additionally machined transverse slots allow the centre of gravity of the rifle to be positioned exactly over the centre of the bench rest wedge.

Weight: 204 g, Angle of tilt: 10°

Item No.: 1024 (Illustration with 1023-S)

7

7 Benchrest wedge Catamaran ECO

Aluminium Ssupport rail for straight shafts.

- Precise support due to inserted steel runner
- Two neodymium magnets to mark the support position
- Can be extended with Catamaran Eco-Weight

Weight: 470 g

Length: 352 mm

Width: 58 mm

Item No.: 1030

8

8 ADDITIONAL WEIGHT for the Catamaran ECO series

- Set of rod and 2 weights
- further weights (á 27 g) can be upgraded
- Weight of the set: approx. 115 g

Item No.: 1032

9

9 Stabilizer bar BALANCE CHEEK

Stabilizing bar (40 g) with 2 weight rings (30 g ea).

Item No.: 1028

10

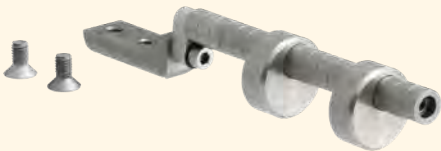

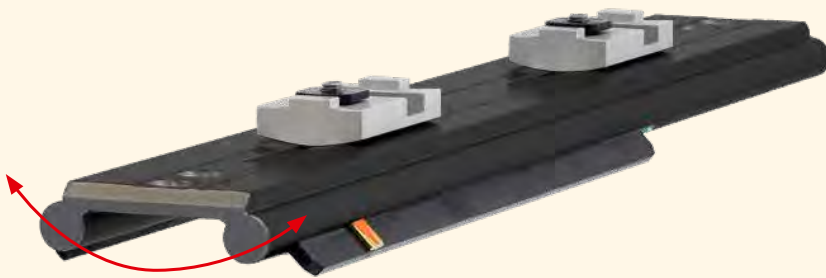

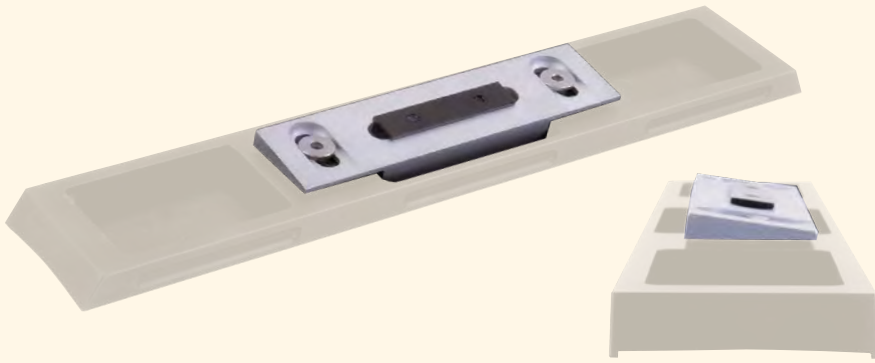

NEW!

10 STEYR support plate

Support plate for STEYR air pistols and other brands. Support plate for mounting in the grip incl. sleeves and screws.

Supplied without grip.

Item No.: 1031

BENCHREST

1 BENCHREST STOCK BR 50

For square and round ANSCHÜTZ actions.
ANSCHÜTZ has developed a non-stained stock with a very wide, flat fore-end especially for "bench rest" shooting.

Material: natural walnut.

Suitable for all square 2013 and 2007 barrelled actions.

Item No.: 016632 (BR50-U1)

Suitable for all round 1913 and 1907 barrelled actions.

Item No.: 016631 (BR50-U2)

1

2 BENCHREST STOCK BR 50

One great bench advantage with the BR50-U7 design is the bottom of the forearm and the bottom of the butt stock run parallel to each other. If you slide your rifle forward or rearward on your front and rear rest you will not have a change in elevation.

Suitable for all round 1913 and 1907 barrelled actions.

Item No.: 016939 (BR50-U7)

2

3 Bench rest stock AS-300 without butt plate and wedge

A stock designed for small bore bench rest shooting with a low lying centre of gravity.

- Finely adjustable cheek piece.
- Can be used with ANSCHÜTZ Match 54 actions with round receivers.
- Models 1407–1413, 1807–1813, 1907–1913.

The walnut thumbhole stock can be adjusted in length by the butt plate carrier. Vertically adjustable Precise cheek piece with fine adjustment, horizontal micrometer adjustment with up to approx. 40 mm backward displacement of the cheek piece. Sequentially engraved scales guarantee non-interchangeable repetition of the desired settings. The cheek piece settings can be adjusted without tools while in the shooting position. The long fore-end with integrated UIT rail is suitable for all support wedges available on the market.

Overall length: approx. 880 mm–920 mm

Weight: approx. 2500 g

Item No.: AS-300

(For Models 1407–1913) without aluminum butt plate

3

UIT rail

Without aluminum butt plate.

4 Bench rest stock AS-300-U2 with rubber butt plate

Like item no. AS-300, butt with rubber butt plate.

Item No.: AS-300-U2 (For Models 1407–1913)

4

With rubber butt plate.

SANDBAGS

Item No.: 80942

8 STRIKEBAG TRAKKER

- Filled rifle rest cushion
- Non-slip
- Reinforced carrying handle
- Water-repellent outer fabric made of waxed Cordura
- Tear-resistant, wear- and abrasion-resistant

Item No.: 80943

MEASURING

1 BALLISTIC CHRONOGRAPH

The device is designed to measure the speed and kinetic energy ammunition of air guns.

Features:

- Range of measurement : 6,1 – <=500 m/s.
- Current consumption: 100 mA (with LCD backlight).
- Power supply: 2 x AA alkaline battery or AC/DC converter ~230 V/ 7-12 V.
- Dimensions 135 x 67 x 87 mm.
- Weight 600 g.

Measurement function:

- Velocity V [m/s].
- Kinetic energy E [J].
- Average kinetic energy E_{sr} [J].
- Average velocity V_{sr} [m/s].
- Minimum velocity V_{min} [m/s].
- Maximum velocity V_{max} [m/s].
- Absolute velocity dV_{sr} = |V_{max} - V_{min}].
- Standard deviation SV [m/s].
- Velocity feet per second V[fps].
- Rate of fire RoF (rate of fire).

Other function:

- Setting weight of pellets 0.01 - 25.00g.
- Calibration.
- Memory 250 measurement of value.
- Transmission via RS232 or USB-COM cable to computer.

Item No.: 546

2 Sole stiffness measuring device

Conforms to ISSF Rule 7.4.6.7.6.

Item No.: 576

3 OVERLAP MEASURING DEVICE

Conforms to ISSF Rule 7.4.7.8.2

Item No.: 572

4 SHOE MEASURING DEVICE

Conforms to ISSF Rule 7.4.7.3.4.1

Item No.: 575

5 THICKNESS AND RIGIDITY GAUGE

This new measuring device can measure the thickness as well as the rigidity of your shooting garments. Supplied with case. Conforms to ISSF Rule 7.4.7.7.2.2

Item No.: 548

6 THICKNESS GAUGE

Conforms to ISSF Rule 7.4.7.7.1.1

Item No.: 573

7 TRIGGER PRESSURE GAUGE

- For measuring the magnitude and constancy of the trigger resistance.
- All gauges are fitted with a weight pointer and a drag pointer which indicates the release weight of the trigger.

Trigger pressure gauge: Setting range:

Item No.: 541 25 – 250 g

Item No.: 543 200 – 2000 g

8 TRIGGER TESTING WEIGHT

- Comprising 4 parts. Air pistol 500 g, standard pistol 1000 g and target pistol 1360 g can be checked with one gauge.
- Spring pre-loaded for smooth measurement.
- Includes 140 g replacement weight.

Item No.: 545

9 PISTOL BOX

For all current air pistols. Conforms to ISSF Rule 8.1.6.0
Dimensions: 420 x 200 x 50 mm.

and for sports pistols. Conforms to ISSF Rule 8.1.6.0
Dimensions: 300 x 150 x 50 mm.

Item No.: 577

10 SCORING GAUGE

Available in calibres .177 for air pistol and air rifle, and .22l.r., .32 and .38. The scoring gauge is supplied with or without magnifier.

Item No.: 550 .177 air rifle with magnifier
Item No.: 551 .177 air pistol with magnifier
Item No.: 552 .22 l.r. with magnifier
Item No.: 553 .32 with magnifier
Item No.: 554 .38 with magnifier
Item No.: 555 .45 with magnifier
Item No.: 556 .177 air rifle
Item No.: 557 .177 air pistol
Item No.: 558 .22 l.r.
Item No.: 559 .32
Item No.: 560 .38

10

11 ACCURIZE SHOOTING SYSTEM

Professional indoor shooting training for hunters, sport shooters and biathletes

The Accurize system consists of a simulator monitor screen, a tripod and a USB charging cable.

The targets and the buffer cartridge/acoustic pin must be ordered separately.

The system works like this:

When you pull the trigger on your hunting rifle, the firing pin hits the buffer cartridge in your chamber. This triggers a laser beam to hit the screen that detects light refraction. For small bore .22 l.r. or 9mm pistols, an acoustic pin is inserted into the barrel from the front. The acoustic pin is also available for pistol 9 mm or .308. This hit is then sent via Bluetooth sent to a smartphone or tablet and marks the hit exactly.

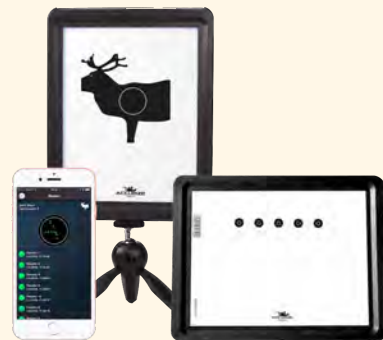

The system offers optimal training value by providing the same experience as on the range. The system calibrates with a single shot so that no changes need to be made to your rifle. A history function allows you to compare your results. Train at home, while traveling, or wherever it's convenient. The system is designed for indoor use. Distance 5 m or 10 m.

Scope of delivery:

Simulation screen, tripod, USB cable.

Item No.: ATM

11

12

Akustik-Pin für diverse Kaliber

Kal. .308 Win.

12 Laser cartridge cases/acoustic pins for the Accurize Shooting System

When you pull the trigger on your hunting rifle, the firing pin hits the buffer cartridge in your chamber. This triggers a laser beam and hits the screen that detects light refraction. Occasionally, instead of the laser cartridge case, an acoustic pin is used that is inserted into the muzzle of the rifle and triggers a laser beam due to the vibration of the rifle as it is fired. Below you will find our best sellers.

Item No.: LC9MMAC (Cal. 9 mm, acoustic pin)
Item No.: LC308WINAC (Cal. .308 Win., acoustic pin)

COMPRESSED AIR & COMPRESSORS

1 PE 100 HIGH-PRESSURE COMPRESSOR

Robust technology in a compact design

Legendary reliability in a new design: Thanks to the world-proven compressor block of the PE 100. Improved cooling and thus longer filter service life. A new hose in rich orange rounds off the look. The PE 100 is by far the smallest and lightest unit in the PE series. The possible uses of the compressor are virtually unlimited: The PE 100 is ideal for use even in the most remote locations. But no matter where you use it – with its new design, it will take pride of place. The PE 100 is ideal as a breathing air compressor for groups of divers and fire crews or for the rapid filling of cartridges for sport shooting and paintball.

PE 100-TW Alternating current motor 230 V, 50 Hz, 100 l/min, 225 bar, 44 kg, 68 × 38 × 43 cm

Item No.: PE100 TW

2 PROTECTIVE WRAPPING for compressed air cylinders

This protective wrapping can be adjusted in stages from 35,5 to 57 cm and protects the compressed air cylinder from damage, dust and moisture. Valves and threads on the compressed air cylinder thus remain protected. Suitable for ANSCHÜTZ, FWB, Walther and other cylinders up to a diameter of 33,5 mm. Supplied without the compressed air cylinder.

Item No.: 1320

3 Hill Dry-Pac Pro Air Dryer Filter

Provides ultra clean and dry air even in the most humid conditions and environments.

Pressure rating of up to 4500 psi / 310 Bar.

Has 4 stages of Filtration:

- Stage 1: PMV Regulated Condensation.
- Stage 2: Activated Carbon Filters
- Stage 3: Absorption Desiccant Media.
- Stage 4: Micro Fibre

Item No.: 8311

4 MK5 piston assembly kit

Set consists of 1 small green seal, 1 brass piston and holder.

Item No.: Z5128-275

5 EC-3000 Rupture Disc Kit

Replacement burst disks for the Hill EC-3000 electric compressor, contains 2 x 5K burst disk for EC-3000a.

Item No.: Z3000-532

6 EC-3000 50-Hour-Service-Kit

This service kit is intended for use after 50 hours of operation of your EC-3000 compressor.

Item No.: Z3000-526

7 EC-3000 100-Hour-Full-Service-Kit

This service kit is intended for use after 100 hours of operation of your EC-3000 compressor.

Item No.: Z3000-527

8 COMPRESSED AIR HAND PUMP MK5 with manometer

For easy fill up of your compressed air cylinders from rifles or pistols.

- 5th Gen of the one and only Hill Pump
- Less Effort, we have made the MK5 pump even easier to pump.
- High Volume, we have kept the highest volume output 0,231 L so less pumping.
- Hill Warranty, each pump carries the Hill Limited Lifetime Warranty.
- Using the Patented, Hill Dry Pack gives 90% Dry Air, great for your gun.

Item No. 8300 (without dry filter)

Item No. 8301 (without dry pack unit)

Item No. 8309 (with 1/8" BSP connection)

COMPRESSED AIR & COMPRESSORS

9

9 Hill EVO 310 Electric Air Compressor

The EVO has a number of changes and improvements in how the compressor works, including some great new features, making the Hill Compressor even more reliable, durable and with a better user experience. We have built in an Automatic Air Pressure Purge. This kicks in whenever the motor on the compressor stops, so when it goes into a cooling cycle and when a fill is paused or finished. This not only takes the strain off the motor when starting again against very high pressures, but has the added benefit of purging the air, including any moisture from inside the unit. This is very important for people filling larger rifles and or cylinders. We have built in a new highly accurate digital pressure sensor with an additional analogue gauge, this is extremely accurate, but also means that you no longer need to recalibrate the compressor during a major service. The EVO can be set as low as 50 bar (755 psi) and up to 310 bar (4500 psi). The evo also benefits from completely new electronic architecture along with completely new software

Some Features of the EVO 310:

- Patented Innovation.
- CE Certified with Built In Safety.
- Quietest Compressor on the market running at just 75db.
- Fast fill - Pistols approx. 1 min and Air Rifles approx. 3min from 0 to 250 bar.
- Set pressure up to 300 bar, with auto shut off.
- Fully automated

Fill Times 0 to 200 bar:

- Average Pistol 1 min
- Average Rifle 250cc 3min
- Large Rifle 500cc 6min

Top Up Times 100 to 200 bar:

- Average Pistol 30 sec
- Average Rifle 90sec
- Small Bottle 500cc 3min

The Hill compressor is Designed and Manufactured by Hill Pumps, and is made in Sheffield, England. The EVO 310 is covered by Patent and carries Design Right Protection around the world. It is CE marked, certified and manufactured under BSI ISO 9001 standards.

Size: 46 x 38 x 23 cm

Item No.: EC-3000

10

11

10 HILL SILICONE OIL

The original Hill Silicone Oil was specially developed for the Hill Compressor EC-3000. Hill recommends changing the oil every 50 operating hours or once a year. The engine oil should also be changed at these intervals!

Item No.: 8308 (silicone oil, 100 ml bottle)

11 HILL CRANK OIL

The original Hill Crank Oil (motor oil) was made special developed for the Hill Compressor EC-3000. Hill recommends changing the oil every 50 operating hours or once a year. The silicone oil should also be changed at these intervals!

Item No.: 8307 (crank oil, 50 ml bottle)

AMMUNITION BOXES AND AMMUNITION

1 SAFETY BOX

Safety-Box for pellet tins. The annoying problem of attaching and removing the adhesive tape from the tins is now over. The tin is simply put in the Safety Box and is ready for use.

Item No.: 2101

2 The Cartridge Rack Kit

The Cartridge Rack Kit consists of three interchangeable trays which fit different cartridge boxes. The „Easy Pick Up“ Rack makes picking up cartridges from the box easy and effortless.

Item No.: 1002

3 PELLET BOX

The secure competition packaging.

- Simple to fill and easy to take out.
- Suitable for 4,5 mm (.177) calibre.
- For 100 Diabolo pellets.

Item No.: 1001 (blue)

Item No.: 1001-P (pink)

4 AMMUNITION BOX

The SB-200 ammunition box for .22 Lr., .17 Mach 2 and .17 HMR has been developed to facilitate removal of the ammunition in sports shooting. It is especially suitable for low temperatures, when the fingers tend to stiffen. The box has a capacity of 100 cartridges plus 2 cartons which fit in the middle.

Dimensions: 22 x 11 x 5 cm

Item No.: 269

5 Diabolo Protection Box

Safety-Box for pellet cans. To avoid the problem of having to handle the adhesive strips on the cans. Simply put the can in the Protection box.

Available in two different colors

Item No.: 2110 (blue with ahg-Anschütz logo)

Item No.: 2111 (black with Anschütz logo)

6 SPORT PELLETS

Sport pellets for air rifle or air pistol, made by H+N.

- Only available in 4,5 mm calibre.
- For air rifle and air pistol.
- Tin with 500 pellets.

Item No.: 2103 (4,5 mm, 530 mg)

7 PREMIUM MATCH PELLETS

Target pellets for air rifle and air pistol, made by RUAG.

- Available in caliber 4,48 mm; 4,49 mm; 4,50 mm and 4,51 mm.
- For air rifle and air pistol, please specify when ordering.
- Tin with 500 pellets.

Item No.: 2100-448 (4,48 mm, 530 mg)

Item No.: 2100-449 (4,49 mm, 530 mg)

Item No.: 2100-450 (4,50 mm, 530 mg)

Item No.: 2100-451 (4,51 mm, 530 mg)

8 MEISTERKUGELN

Premium target pellets for air rifle and air pistol, made by RUAG (RWS).

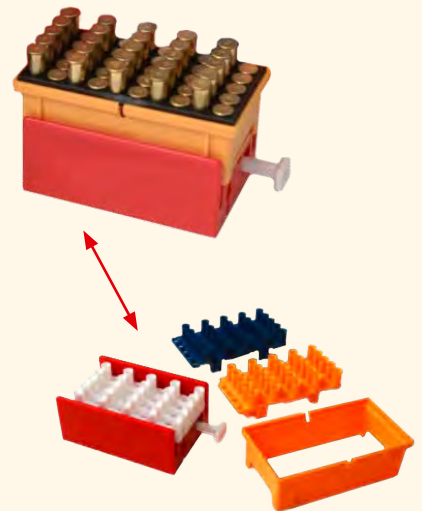

- Available in sizes 4,5 mm.
- For air rifle and air pistol.
- Tin with 500 pellets.

Item No.: 2102-450 (4,5 mm, 530 mg)

13 Qiang Yuan pellets STREAMLINED

Qiang Yuan pellets for air rifle streamlined head, boxes of 500 ea., very good for field target discipline.

- Available in Headsizes 4,49 and 4,50 / cal. .177.

Item No.: 2112-550-4.49 (4,49 mm, 550 mg)

Item No.: 2112-550-4.50 (4,5 mm, 550 mg)

Item No.: 2112-560-4.50 (4,5 mm, 560 mg)

Item No.: 2112-620-4.49 (4,49 mm, 620 mg)

Item No.: 2112-620-4.50 (4,5 mm, 620 mg)

14 Qiang Yuan pellets MAGNUM

Qiang Yuan pellets for air rifle streamlined head, boxes of 400 ea., very good for field target discipline.

Item No.: 2114 (4,5 mm, 900 mg)

12

13

GUN CARE

1 Carbon cleaning rod

This carbon cleaning rod is distinguished by qualities such as tensile strength, rigidity, flexibility and corrosion resistance. Damage to chamber or barrel by bending of the rod is almost impossible. The lightweight carbon rod is inserted free of play with axial ball bearings, specially designed for this application, in the handle so that friction is greatly reduced. The cleaning material thus follows exactly the barrel's profile (land and rifling).

Technical data

Ø 5 mm single piece, wiping length 900 mm, for cal. .22 l.r. to 6,5 mm, external thread 1/8". The carbon cleaning rod is supplied with cleaning set Item. 581.

Item No.: 580

2 Brush Cleaning Set

Consisting of: Brass spike for cotton patches, woollen swab and feather brush for cal. .22 l.r. Internal thread 1/8".

Item No.: 581

3 Cleaning accessories for cleaning rod

Adapter for internal thread 1/8" to 8 x 32.

Item No.: 586

Brass spike for 1" cotton patches, suitable for cal. .22 l.r., internal thread 1/8".

Item No.: 582

Spring brush in pack of 3, suitable for cal. .22 l.r., internal thread 1/8". The special spring brush adapts to the internal profile of the barrel, follows the twist of the barrel exactly and removes bullet and powder residues.

Item No.: 584

Brass brush in pack of 3, suitable for cal. .22 l.r., internal thread 1/8".

Item No.: 585

Woollen swab in pack of 3, suitable for cal. .22 l.r., internal thread 1/8".

Item No.: 583

4 Bore Tips

The Swab-Its Bore-Tips Cleaning Swabs are unique foam swabs that are just the thing for giving your barrel a good cleaning. By utilizing a polyurathane foam molded over a polymer jag the Bore-Tips achieve a very tight fit in the bore. Additionally, Bore-Tips can be washed with soap and water and reused. The molded thread fits tightly and securely in to cleaning rods and can be removed and used again and again with no damage to the threads. For rods with different thread you have to use an adapter like item no. 586

Bore-Tips are available for several calibers and because they are foam and not cotton, they leave no fuzz or fibers behind. Also, because the foam swab is sponge-like it absorbs solvent and lube with less mess and makes complete contact with bore when passing through which ensures a completely coated bore.

Technical information:

- Swab material: Polyurathane foam.
- Jag material: Polypropylene plastic.
- Thread: 1/32"

Item No.: 590 cal. .22

Item No.: 591 cal. .243

Item No.: 592 cal. .30 / 7,62 mm

Item No.: 593 cal. .357 / 9 mm

Item No.: 594 cal. .40 / 10 mm

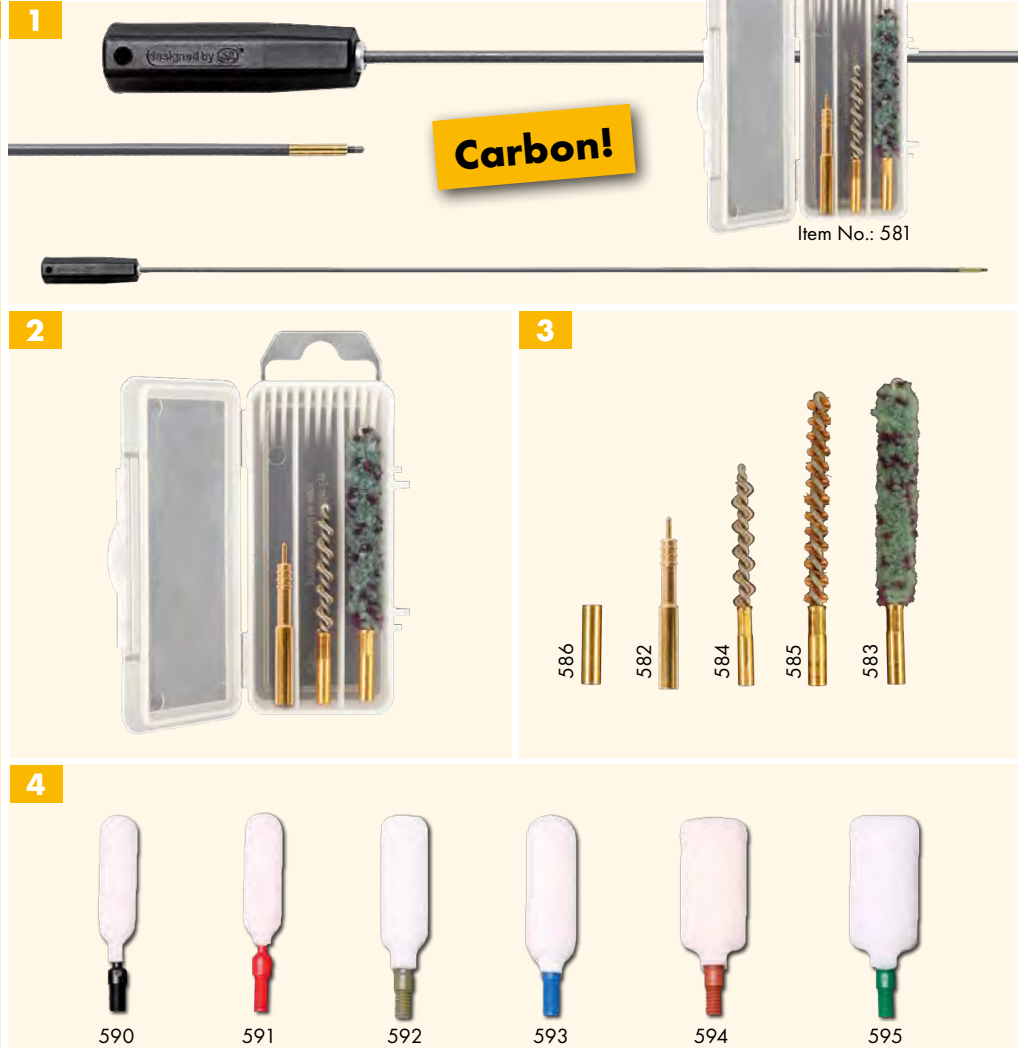

Item No.: 595 cal. .45

5 Ammobox

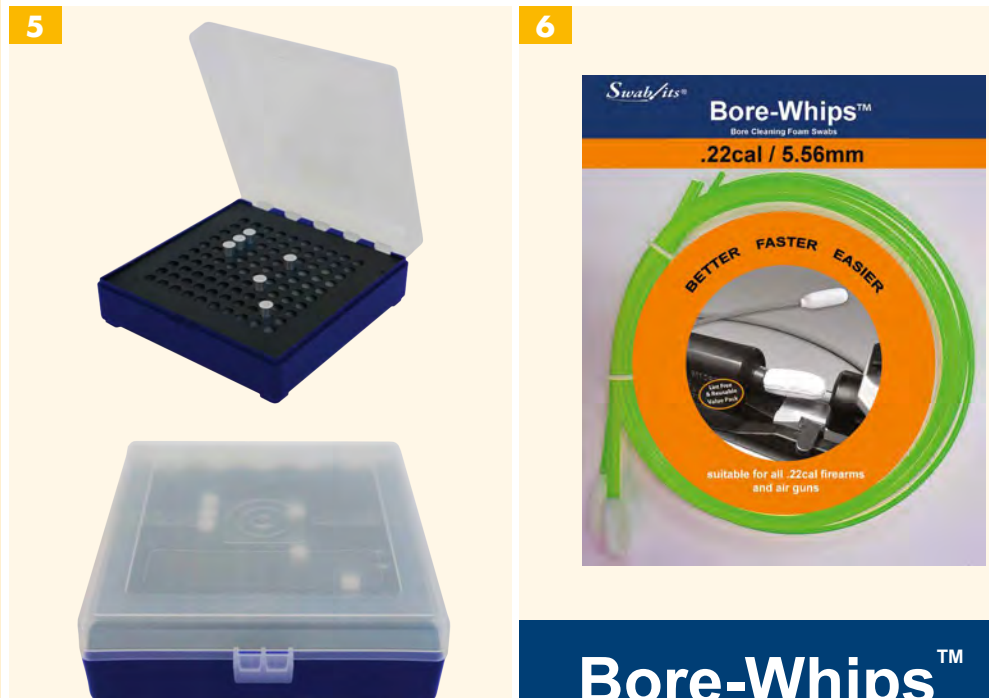

For 100 bullets.

CAL: .22 l.r. – 25ACP

Item No.: 270

Bore-tips™

Bore-Whips™

PTFE- & Silikon-FREE

6 SWAB-ITS Bore-whips

Swab-Its, the quick, efficient and less messy method of firearm cleaning. The new Swab-its Bore-whips is a pull-through design made to the same durability, reusability and lint-free standard as our Bore-tips and Gun-tips, providing 360 degree bore coverage without the use of metal components. Bore-whips are available in three-piece packs in both .177 and .22 caliber models. Their pull-through design allows for cleaning the proper way, from the action to the crown. Their vibrant orange and green handles do double duty; acting as an Empty Chamber Indicator (ECI) at the range. Bore-whips can be washed with soap and water and reused.

Attention: Do not use with ammonia-based solvents.

Item No.: 501 (for cal. .22 l.r., green)

7 ANSCHÜTZ ceramic coating

Aerosol can

ANSCHÜTZ Keramik Coat is a heavy-duty ceramic coating for all types of firearms and knives.

Despite its excellent lubricating properties, ANSCHÜTZ Keramik Coat is residue free; it forms an invisible film on the firearm:

Its structure bonds firmly with the treated surface and provides long-lasting protection against corrosion, while the ceramic structures give the firearm a highly polished appearance. The functionality is maintained and the shooting precision can be improved by polishing the barrel profile. ANSCHÜTZ Keramik Coat works on metal and plastic. Right from the first treatment - even with older firearms.

- Residue-free, non-greasy coating.
- Prevents dust from accumulating.
- Long lasting effect.
- Economical in use.
- Salt and fresh water resistant.
- High temperature resistant from 40 °C to +750 °C.
- Cleaning of the firearm is made easy.

Extremely flammable aerosol. Pressurized can. May burst if heated. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Do not pierce or burn, even after use. Keep away from heat, sparks, open flames, hot surfaces. No smoking. In use, May form flammable/explosive vapor-air mixture.

Item No.: 563 100 ml aerosol can
Item No.: 565 300 ml aerosol can

8 ANSCHÜTZ ceramic coating liquid

Like item 563 and 565, but liquid.

Causes serious eye damage. Keep out of reach of children. Do not get in eyes, on skin or on clothing. IF SWALLOWED: call a poison center or doctor/physician if you feel unwell.

Item No.: 564 100 ml liquid.

9 FlunaTec Gun Cleaner

Fluna GunCleaner is a high performance barrel cleaning paste for all firearms. Fluna GunCleaner removes powder residue, lead, copper and tombac from all sorts of barrels.

- Easy to use.
- Effective in cleaning.
- Quickly visible result.
- Safe for barrel steel.

Irritating to eyes. Keep out of reach of children. Avoid contact with eyes, skin or clothing. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed, seek medical advice immediately and show this container or label.

Item No.: 567 50 ml

8

PTFE- & Silikon-FREE

10

12

10 LUPUS PROFESSIONAL PTFE High Tech weapons grease

Especially for the whole weapon incl. inside from the barrel and shaft, wood & metal, high slide character & perfect protection seals. Exists of microfine, spherical Teflon particle (PTFE), high-quality oils and custody shares provide for a prolonged protection in the dry state even under the most extreme application terms. By the spherical Teflon particle you reach the highest slide character with mechanical components. Water resistantly, resistant to temperature, freely of resin and freely of acid. Also Stocklumbers and other surfaces are absolutely water resistant in the dry state.approx. 50 g

Item No.: 510

11 FLUNA SDR CLEANER FOR SILENCER

Special cleaner for cleaning all types of silencers Fluna SDR is a special cleaner and degreaser for the automatic cleaning of silencers. Fluna SDR automatically removes powder smoke and combustion residues from metal surfaces.

- Automatically cleans residue-free and degreases at the same time.
- Easy to use, very good material compatibility.

Item No.: 569

12 5L REFILL - FLUNA SDR CLEANER FOR SILENCER

Item No.: 569-5L (5 liter canister)

23 ahg-CLEANING ROD GUIDE

The alu guide is designed to assist the cleaning rod slide centrally and smoothly into the breech of your rifle, protecting the breech from any damage and prevents solvents and oils from leaking into the trigger /breech when cleaning. The ahg guide have a lock-in mechanism (two O-rings), preventing movement whilst cleaning your barrel, to be sure that your cleaning rod is running parallel to the breech.

Item No.: 015123

24

25

24 CLEANING ROD

For cleaning rifles and pistols.

- Cleaning rod (86 cm) with rubber coating.
- for cleaning pads and cleaning brushes.
- For 4,5 mm and .22 l.r. caliber.
- Includes brushes for 4,5 mm and .22 l.r. caliber.

Item No.: 505

25 CLEANING PATCH

Refill pack for Item No. 505.

- 50 Cleaning patches.
- For optimum gun care.
- Absorbent and lint free.

Item No.: 506

26 SIGHT DARKENER - BLACK MATCH

To remove reflections from the front sight, rear sight and barrel.

- Just use it like a lighter:
Light it and blacken the desired parts.

Item No.: 523

Keep away from children. Upon igniting of the lighter and adjusting of the flame (if applicable) keep away from face and clothing.

Contains flammable gas under pressure. Do not expose to temperatures exceeding 50 °C. Protect from sunlight. Do not pierce or place into fire. Ascertain after each use that the flame is extinct completely. Do not keep lit for more than 30 seconds.

GUN CARE

1 Intercept corrosion protection foam for cases, suitcases, and gun cabinets

In this copper-based corrosion protection, highly porous copper particles bound in polymers ensure that corrosive gases in the atmosphere are neutralized. This allows components of all kinds to be preserved and protected. The foam is simply placed in the case, suitcase, or gun cabinet, protecting your firearm from corrosion. The foam lasts for approximately 2 years before it needs to be replaced.

Item No.: 80920

2 Corrosion protection

The corrosion protection of AirGhandi's gun care series reliably protects the barrel and other metal parts of the gun from corrosion and graying. It separates the metal and oxygen and binds mineral salts and combustion residues. It also encapsulates the salts of hand perspiration and provides optimum protection even in rain and increased humidity. The product can be applied very thinly and is therefore very economical.

- Protects against corrosion.
- Excellent adhesion properties that provide a long duration of effectiveness.
- The browning of the gun receives a high gloss finish.
- Removes light flash rust.
- The long-chain structure ensures that the grease stays in place and doesn't run off.
- Neutral when used on plastics.
- Can be used on all metals.

Item No.: 300025 (20 g)

3 Gun Grease

The temperature-resistant gun grease of AirGhandi's gun care series provides protection against wear and tear of your gun's parts. It was developed for use on firearms, but can also be used on melee weapons and spring-piston air rifles. Ceramic solids, which are heat resistant up to 1200°C, are used as a lubricant. The grease can be applied very sparingly.

- Extremely high temperature and pressure resistance
- Higher long-term temperature resistance than silicone
- Without plastics such as PTFE
- Very high temperature resistance from -50° to +250°C
- Long durability thanks to minimal wear of the ceramic particles
- Additionally, protects against corrosion
- Neutral when used on plastics and coatings

Item No.: 300023 (20 g)

4 Gun Lubrication Oil - With Microceramics

The temperature-resistant gun lubrication oil of AirGhandi's gun care series provides protection against wear and tear of your gun's parts. The practical precision dispenser ensures that the oil goes exactly where it should and can be used sparingly. It was developed for use on firearms, but can also be used on melee weapons and spring-piston air rifles. Ceramic solids, which are heat resistant up to 1200°C, are used as a lubricant.

- Extremely high temperature and pressure resistance.
- Higher long-term temperature resistance than silicone.
- Without plastics such as PTFE.
- Very high temperature resistance from -50° to +250°C.
- Extremely long durability thanks to minimal wear of the ceramic particles.
- Additionally, protects against corrosion.
- Neutral when used on plastics and coatings.

Item No.: 300026 (8 ml)

Keep away from children. Contains flammable gas under pressure. Do not expose to temperatures exceeding 50 °C. Protect from sunlight. Do not pierce or place into fire. Ascertain after each use that the flame is extinct completely. Do not keep lit for more than 30 seconds.

1 NEW!

3

4

5

5 Stock oil 50 ml

The stock oil of AirGhandi's gun care series preserves the properties of the wood and prevents natural wood degradation without using artificial dyes or dissolved plastics. It also prevents swelling and shrinkage by preventing water absorption and water release. The dissolved natural solids, such as the wood's own lignin, are absorbed deep into the wood, accentuating the grain.

- Suitable for the finest types of wood.
- Moisture protection.
- Restores the color.
- Increases the mechanical resistance.
- Prevents swelling, graying and rotting of the wood and protects against breakage of the stock due to material fatigue.

Item No.: 300024 (50 ml)

EAR AND EYE PROTECTION

NEW! 6

6 SAHARA Dry Classic Grip Spray & Gel

Who doesn't know the problem in summer? Your hands get sweaty and it's damn hard to squeeze your damp hands into the shooting glove. Or the grip on the gun is no longer there - especially for pistol shooters who don't have the option of wearing a trigger glove.

A good grip is also extremely important for hunting, clay pigeon shooting or IPSC.

Sahara Dry contains ethyl alcohol, which evaporates, and modified silica, which settles in the creases of your hand. Nothing in the product is absorbed by the skin.

The product stays on your hands and will not transfer to the handle of your sports equipment as it has no sticky properties. It is a very fine dust that simply disappears after a while.

Item No.: 80950

Same as item 80950, but in gel form.

Item No.: 80951

7

8

7 Custom Molded Earplugs, DO-IT-YOURSELF KIT

- Molds in 10 minutes.
- Soft, permanent, custom fit for all day comfort.
- Safe, Non-toxic and Hypo-allergenic.
- Long lasting and washable.
- Simple, easy to follow instructions (Video at www.ahg-anschuetz.de).
- NRR 26 dB.

Item No.: 309

8 PELTOR POCKET HEARING PROTECTORS

The slim design of the ear cups is particularly well suited to sports shooters:

- Very light (approx. 180 g).
- Comfortable fit.
- No impediment in the shooting position.
- Amazingly good sound damping properties.
- Continuously adjustable.

Item No.: 313

9

9 TPOCKET HEARING PROTECTORS

A product specially developed for shooters from a sound-insulating perspective:

- Very light (approx. 196 g).
- Foldable.
- Wide, soft sealing rings.
- No impediment in the shooting position.
- Comfortable fit.

BIATHLON ACCESSORIES

1 BIATHLON-SOFT GUN CASE 9212

- For 1827 ANSCHÜTZ Fortner Biathlon.
- Easy to carry on the back with harness of biathlon rifle inside.
- Compartments for tools and accessories.
- Transport window.
- Two handles.
- New zipper system.

Item No.: 9212

2 8012 B BIATHLON SIGHT WITH SNOW PROTECTION FLAP

The new 8000 series sight has been developed and produced to the highest quality standards. The use of stainless steel makes the sight weatherproof. Thanks to a comprehensive range of accessories, the sight is suitable for biathlon as well as for sports small bore and air rifles.

Item No.: 016935

3 6870 BIATHLON GRAIN TUNNEL LUXUS, HEIGHT-ADJUSTABLE

The new standard in biathlon-sight. The redesigned Anschütz 6870 biathlon front sight includes a round housing and an innovative rail incorporated into the base of the front sight tunnel to allow the user to quickly and easily install accessories such as barrel weights or a SCATT adapter. The elevation set uses stainless steel quick-release columns. Extended snow cover. Longer to accommodate the optional 16 mm elevation kit and easy to open.

Item No.: 015787

4 WEIGHTS 2x 50g FOR GRAIN TUNNEL 6870 LUXUS

The redesigned Anschütz 6870 biathlon front sight now includes a rail incorporated into the base of the front sight, allowing shooters to quickly and easily install accessories such as barrel weights or a SCATT adapter.

The weights are supplied as a set with 2 weights. The first 50g weight is mounted on the grain tunnel and the second 50g weight can be screwed into the first. So you can choose between 50g or 100g weight addition.

Item No.: 015788

5 Anschütz Biathlon harness Model Feedback

A Shorter harness developed for the World Cup to provide less bulk and overall size. Due to the over all smaller area, these harnesses don't catch the wind and move your rifle around as much while shooting.

- Anatomically formed 3D cushioned shoulder straps for comfort.
- Soft edges and narrow strap ends also improve the carrying comfort.
- In order for the harness to keep its shape, the robust duratex outer fabric has been reinforced by a 2 mm layer of PE material.
- The long clamp piece that attaches to the rifle is jointed on the harness to help prevent hitting your head on the barrel when running.
- Additionally, a 9 mm diameter strong bungee for securing to the rifle stock rounds off this well-thought-out biathlon harness.
- Shoulder Strap Length: 37cm (measured from top center to end of harness).
- Shoulder Strap Width: 4cm (MAX)
- Total weight: 281 g

Item No.: 015390

6 4738-U2b Handstop for biathlon

with target sling attachment.

Item No.: 001086

7 Biathlon Handstop for UIT rail

Item No.: 4740

BIATHLON ACCESSORIES

8

8 Biathlon Armsling

- With Velcro for right and left hand shooters.
- Available in three different length.

Item No.: 4732 (Size M, Length 38 cm)

Item No.: 4732-U1 (Size S, Length 32 cm)

Item No.: 4732-U2 (Size L, Length 42 cm)

9

10

9 Biathlon Armsling 4734

Arm sling made of non-stretch synthetic material. The inside of the arm sling is lined with top grip material, which increases comfort and prevents the arm strap from slipping on the racing suit. The arm strap is adjusted and fixed with Velcro.

Available in three different length.

Item No.: 4734 (Size L, Length 45 cm, for arm circumference 30-35 cm)

Item No.: 4734-U1 (Size M, Length 43 cm, for arm circumference 28-32 cm)

Item No.: 4734-U2 (Size S, Length 39 cm, for arm circumference 24-28 cm)

11

10 Biathlon Armsling 4733 Light

Like item 4734, but without sythetik material - belt only. Because of this, the sling is lighter.

Available in three different length.

Item No.: 4733 (Size L, Length 45 cm, for arm circumference 30-35 cm)

Item No.: 4733-U1 (Size M, Length 43 cm, for arm circumference 28-32 cm)

Item No.: 4733-U2 (Size S, Length 39 cm, for arm circumference 24-28 cm)

12

11 Biathlon Armsling 4735

Available in two different length.

Item No.: 4735-U1 (Size M, Length 26 cm)

Item No.: 4735-U2 (Size S, Length 24 cm)

13

12 Target Sling 4736

For Handstop 4738-U2.

Item No.: 4736 (right, long)

Item No.: 4736-U1 (right, short)

Item No.: 4736-U2 (left, long)

13 Target Sling 4737

Incl. Handstop 4740

Item No.: 4737

BIATHLON ACCESSORIES

1

1 NEOPREN CUFF

Anschütz Neoprene Cuff for better comfort for the arm sling in summer times. It protects your skin from the direct contact and pressure of the arm sling. Or in the winter time if you have small arms it gives you an additional cover. Measure your arm and choose the right size for you.

Item No.: 4731-22 (22 cm diameter)

Item No.: 4731-26 (26 cm diameter)

Item No.: 4731-30 (30 cm diameter)

Item No.: 4731-34 (34 cm diameter)

2 BIATHLON TACTIC BOARD

Biathlon tactic board with clip for Dox., both sides printed with a target and 2 sets of magnets with number (1-5 and one extra) and lanyard.

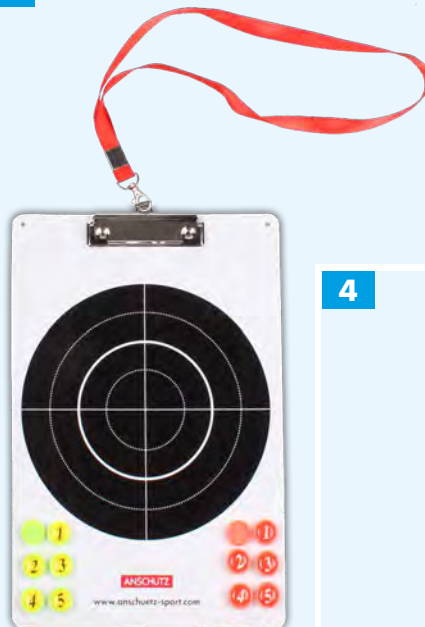

Item No.: 015658

3 MAGNET SET FOR TAKTIK BOARD

Magnet Set existing of 2x 6 magnets with numbers (1-5 and 1 without no.) in orange and yellow color.

Item No.: 015659

2

3

4 Diabolo holder black for 30 diabolos, Target Sprint

The diabolo holder is simply fixed to the prism rail of the rifle. The mounting plate can be attached in 3 different heights. The diabolos are held by an O ring and are easy to be picked up with 2 fingers. Through another mounting plate, available as an accessory set, the capacity can be expanded to 40 diabolos (see item 4726-U1S).

Item No.: 4726-S

4

5 Mounting Kit for Diabolo Holder

For Item 4726-S

Item No.: 4726-U1S (for 16 diabolos)

Item No.: 4726-U2S (for 14 diabolos)

5

ahg-HUNTING ACCESSORIES

6

6 Hunting pillow

The feather-light seat pillow has been designed for the comfortable hunting seat.

Material:

Upper material: warm, comfortable quilted Artic-Fleece.
Inner material: fiber balls cellulose insert.

Lower material: synthetic leather black, dirt-repellent.

Weights only 350 g, size 40 x 45 cm.

Washable at 30 degrees on gentle cycle.

Item No.: 80903

7

8

7 BAGPAD® Shooting rest cushion

The anti-slip side of the cushion is placed on the wooden frame of the pulpit window, thus providing the shooter with an accurate, noiseless adjustment or shot in the direction of the target game

Material:

Outer fabric: Artic fleece padded, dark green with two weights. Inner material: Viscose foam insert padding for noise reduction. Under fabric: Loden 600 dark green with anti-slip. One size fits all: 30 x 25 cm - Total weight very light 590 gr. The product is not washable - dry cleaning is recommended. For small stains simply wipe with a damp cloth.

Made in Germany

Item No.: 80904

8 Set of gun rest and seat pad

Item No.: 80910 (seat pad and gun rest)

9

9 ANSCHÜTZ Outdoor hat "Camo"

Made of Italian thermal fleece breathable, washable up to 30°C, color gray.

Material: 85% Polyester, 15% Elastan

Item No.: 015502-S/M (Size S/M)

Item No.: 015502-L/XL (Size L/XL)

10 ANSCHÜTZ multifunctional scarf "Camo"

The perfect companion on cold autumn and winter days elastic polyester fiber can be transformed into different headwear in just a few simple steps, washable at 30°C, colors gray.

Material: 88% Polyester, 12 % Elastan

Item No.: 015501 (one size)

10

11

11 Anschütz multifunctional glove "Camo"

Elastic backhand fabric for the best fit. Hard-wearing palm made of fine synthetic leather. Touch finger for operating smartphones. Wipe terry thumb to sweat.

Washable up to 30 ° C

Material: 41% polyamide, 37% polyester, 12% polyurethane, 10% elastane.

Item No.: 015503-S (Size S)

Item No.: 015503-M (Size M)

Item No.: 015503-L (Size L)

Item No.: 015503-XL (Size XL)

Item No.: 015503-XXL (Size XXL)

ahg SMALL BORE RIFLES Model F27A / ACCESSORIES

1 ahg F27A Precise

This highly accurate small-bore target rifle with straight pull action has been developed as a result of close cooperation with experienced target shooters and the knowledge resulting from it. The use of high quality materials, combined with solid and tried and tested technology, provides the precision required, not only by top class shooters, to be successful. Biathletes worldwide already value the reliability, precision and the operating convenience of the straight pull action during the loading procedure. The centralised locking mechanism of the straight pull action with the receiver offer optimum absorption of the forces created at shot release. Milled from solid, high tensile aluminium, this stock has a very slim fore-end with large radii and is suitable for all hand sizes.

The wedge shape of the longitudinal axis of the stock was calculated using complex analysis programs. Consequently, optimum vibration behaviour, stability and shooting precision have been achieved. Multifunctional, stable and variable cheek piece notch adjustment with especially large adjusting range and precise adjustment of height and lateral settings allows an optimum adaptation/ correction to the shooting position. The cheek piece can be adjusted in two different ranges.

Includes:

F27A in Precise aluminium stock, with for-end raiser block and ahg Integral 6229 hand stop, without sights.

Item No.: F27A-660-Precise

Item No.: F27A-690-Precise

2 ahg F27A in G & E Aluminium Stock

Includes:

F27A in G & E RS II aluminium stock with for-end raiser block and ahg Integral 6229 hand stop, without sights.

Item No.: F27A-660-G+E

Item No.: F27A-690-G+E

3 ahg F27A with a Benchrest stock AS-300

This highly accurate small bore target rifle with straight pull action has been developed in close cooperation with experienced target shooters and the knowledge resulting from it. The use of high quality material combined with solid and tried and tested technology offers the precision necessary to be successful not only to top class shooters. Bedded in a non stained BR 50 walnut stock with a wide, flat, forend.

Delivery volume:

F27A in AS-300 Benchrest stock.

Without butt plate and sight set.

Item No.: F27A-660-AS300 (without butt plate)

Item No.: F27A-690-AS300 (without butt plate)

4 F27A Barrel extension tube set

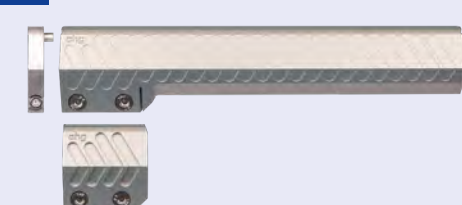

Made from high-strength aluminum and naturally anodized, this ahg-tube extends the sighting line by 157 mm. The weight of 163 g optimized the muzzle inertia during shot release and also allows more added weights to balance the sporting rifle ideally.

A center ring with an integrated positioning pin is supplied which allows a repeatedly exact mounting and de-mounting of the barrel extension. This tube should be cleaned after each shooting heat in order to avoid oxidation and guarantee optimum operation.

The robust clamp made from stainless steel threaded nuts and cylinder screws ensures best functioning.

4

5

STEYR SPORT AIR RIFLES AND PISTOLES

6

This set includes additionally a front sight which can be used in standing position in case less weight and sighting line is favored. Upon changing, the center ring remains on the barrel and ensures a quick and repeatedly accurate mounting between positions.

The ahg-barrel extension is especially crafted with an inner diameter of 23.05 mm, accurately fitting all F27A models.

Item No.: F27A-10 (Set complete)

Item No.: F27A-15 (Tube only)

7

5 Cleaning rod guide

Cleaning rod guide for ANSCHÜTZ straight pull action mod. 1727 F, 1827 F & ahg-F27 A. The new ANSCHÜTZ cleaning rod guide facilitates cleaning of the gun with straight pull action. Using this cleaning rod guide protects the cartridge chamber and trigger unit from scratches, cleaning agents and residues from the barrel.

This cleaning rod guide is suitable for all cleaning rods and attachments up to cal. .22 l.r.

Item No.: 013711

8

6 STEYR Challenge E

The unique STEYR CHALLENGE is indeed a major challenger to the best air rifles in the world. Equipped with an electronic trigger and multifunctional adjustments the rifle can be made to fit the shooter perfectly. It represents the new generation of the STEYR LG 110.

The original STEYR LG 110 match air rifle was used by Thomas Farnik to create a new World Record in the Olympic Final.

(R)evolutionary air rifle technology:

- Patented STEYR Stabilizer provides absolutely no recoil while shooting.
- Individually adjustable stock for the needs of each shooter.
- Fore-end adjustable in length, height and swivel-mounted.
- No movement at the trigger take up.
- Redesigned loading area for better access.
- External velocity adjustment.
- CONNECT: quick take down buttstock for comfortable transport!

Item No.: Steyr Challenge E

9

10

STEYR evo 10E

- Accuracy: First stage travel – point of release – hit: minimal movement during the shot release
- The shooting hand is not disturbed when the shot breaks.
- Contact made out of gold instead of microswitch, no movement at the trigger take up.
- Infinitely adjustable STEYR electronic precision ball bearing trigger with the possibility to move the trigger backwards for shooters with small hands.
- Capacity of at least 10.000 shots with a full akku, 300 shots possible after light up of the lamp.
- Rotable rear sight and front sight and better adjustment of the rear sight depth.
- Proven and patented STEYR stabilizer made out of tungsten alloy.
- Dry fire training operates without cocking.
- Pistol available in silver or black, 11 different redesigned grips available.

Item No.: 10 E Evo (no illustration)

9 STEYR LP 50

The 5 shot STEYR LP 5 has had a long and outstanding career. Now STEYR have developed the LP 5 into the LP 50. This pistol became even smoother and ensures the stability of an ideal competition weapon in any air pistol discipline. Being a great 5 shot weapon for the training of any dynamic pistol disciplines, the LP 50 is even more useful!

- Standard trigger adjustable from 450 g to 1.050 g.
- Three barrel vents steady the weapon additionally when shot is released.
- Maximum safety: shots only possible with magazine inserted.
- Infinitely adjustable length of sight from 307 to 350 mm
- Eight different grips available.
- Compressed air cylinders with German WIKA quality pressure gauge.

Item No.: LP50

10 STEYR LP 2

Nickel plated barrels, anodised aluminium surfaces and legendary precision make the LP 2 the ideal match pistol! The best materials and the most modern manufacturing techniques symbiotically combined. Even the trigger system and the grip are to the highest STEYR competition level!

The LP 2 dispenses with the barrel unit, barrel bore and stabiliser, but still has all the features that make a competitive competition pistol. With the loading pin system it is easy to operate and it can be optimally adjusted to the shooter: modifiable sighting line, specially designed barrel weights which, as with all STEYR air pistols, lie on the axis of the barrel.

Item No.: LP 2

7 STEYR Biathlon Air Rifle

- The STEYR LGB 1 air rifle is the ideal training weapon for all biathletes and also the perfect competition weapon for junior and summer biathlon. Thanks to its individually adjustable stock and engineering perfected to the last detail the LGB 1 impresses with the greatest functional safety in summer or winter conditions.
- Quality barrel by ANSCHÜTZ.
- Sighting device with snow cover for insert holder and rear sight.
- Grooved receiver for hand stop and target sling.
- Carrier for 8 magazines.

Item No.: LGB1

Item No.: LGB1L (left hand version)

8 STEYR evo 10E

- NEW: 8 duct compensator.
- Rotable front sight and rear sight.
- Patented STEYR Stabilizer from the nearby unbeatable LP 10.
- Three barrel vents steady the weapon additionally when shot is released.
- Infinitely adjustable STEYR precision ball bearing trigger.
- Maximum safety: shot only possible when bolt is fully closed.
- Pistol available in silver or black, with compressed air cylinders in silver, black, blue or gold, thirteen different redesigned grips available.

Item No.: 10 Evo

MORINI – AIR PISTOLS

1

1 Morini CM 162 EI

- Temperature-independent compressed air is used as the propellant.
- Detachable, exchangeable cylinder with built-in pressure gauge.
- Compressed air reserve 200 bar, sufficient for approx. 180 shots (per cylinder).
- When the charging pressure falls, the cocking lever is disabled by a latching hook.
- Electronic, maintenance-free, absolutely dry precision trigger, adjustable from 300–700 g, max. 1000 g (first stage from 50–300 g).
- Battery sufficient for more than 15,000 shots, with switch for battery conservation, indicator light for battery state.
- Dry firing possible without any problems.
- Anatomically shaped Morini walnut handle with adjustable hand rest available in various sizes for right or left-handed shooters.
- Consistent discharge ballistics due to built-in compensator.
- Rear sight adjustable in height and width.
- Standard insert width is 5,0 mm.
- Special accessories: alternative inserts of 3,5–4,0–4,5–5,5 6,0 mm.

Supplied in hard-shell case with tools and brass filling adapter, and also two compressed air cylinders, both fitted with pressure gauges.

Item No.: CM162EI

Morini CM 162 EI (short)

Same design and features as the well-known CM-162EI model, but with a short barrel and weight only 970 g. Compressed air supply 200 bar, sufficient for approx. 150 shots (per cylinder), sights moved closer to the wrist.

Item No.: CM162EI-SHORT (not shown)

2 Morini CM 162 EI Titanium

- As CM 162EI but in Titanium color.

The difference to the normal pistol:

- Air cylinders equipped with digital manometer.
- 3.7 g hammer for faster valve opening and reduced recoil.

Supplied in hard-shell case with tools and brass filling adapter, and also two compressed air cylinders, both fitted with pressure gauges.

Item No.: CM-162EI-TI

3 Morini CM 162 MI

Same design and equipment as the CM162EI model, but with a mechanical trigger system.

Item No.: CM162MI

4 Morini CM 200 EI

The new Morini CM 200 EI is an improving of our traditional technique, has much more performance and reaches the high technical requirements of the shooters.

- New charging lever made from carbon fiber.
- New trigger unit with new electronic separated in 2 parts.
- New cover plate for electronic made of carbon fiber.
- New EDM ventilated barrel for less recoil.
- New compensator.
- New individually grip adjustment.

Item No.: CM200EI

MORINI – AIR- AND SMALL BORE PISTOLS

5

5 Morini CM200EI Ticino with electronic trigger

The new CM 200 EI is a refinement and improvement of the proven technology of model 162 EI

Item No.: CM-200EI-blue

Item No.: CM-200EI-red

6 Morini CM 84E Carbon

- Electronic, ball-bearing, maintenance-free and absolutely dry trigger.
- Supplied with three trigger springs - assembled: 0 - 22 g; enclosed: 22 - 160 g and 160 - 300 g
- a light barrier on the trigger protects against unintentional firing of a shot.
- Battery capacity for approx. 5000 shots, dry training possible without any problems.
- Stable touch and perfect results thanks to Lothar Walther's extremely low-vibration precision barrel, designed as a direct extension of the wrist.
- adjustable Morini glove grip made of high-quality walnut wood available in different sizes for right- and left-handed shooters.
- Rear sight adjustable in height and width via precision grid.
- Standard grain width: 5.0 mm.
- Special accessories: interchangeable front sights in 3.5 - 4.0 - 4.5 - 5.5 and 6.0 mm.
- Delivered in a sturdy hard-shell case, including tools and cleaning rod.

Item No.: CM-84E-CF (Single stage trigger)

Item No.: CM-84E-CF-TS (Two stage trigger)

6

7 Morini CM 84 E

- Electronic, ball & socket mounted, maintenance-free and absolutely dry precision trigger.
- Supplied with three trigger springs. Fitted: 22 - 160 g. Enclosed: 0 - 22 g and 160 - 300 g.
- A light barrier on the trigger secures against the unintentional firing of a shot.
- Stable firing position and perfect results due to the extremely low vibration precision barrel, designed as a direct extension to the wrist by Lothar Walther.
- Morini glove grip in high quality walnut wood.
- The adjustable handles are available in various sizes for right and left-handed shooters.
- Rear sight continuously adjustable in width to suit the individual.
- Standard insert: 5,0 mm.
- Special accessories: alternative inserts of 3,5-4,0-4,5-5,5 6,0 mm.
- Supplied in an elegant hard-shell case, including tools and cleaning rod.

Item No.: 014690 10 mm

31 Jaw adjustment OPEN position,
reverse displacement

To optimize the shooting position, especially for bench rest shooting, the stable and infinitely adjustable mechanism (up to 13 cm to the rear) is mounted on the original ANSCHÜTZ cheek piece adjuster (2213-8200).

Item No.: 016984

MONACO COMFORT

1

1 Shooting jacket MONACO COMFORT

The combined leather/canvas shooting jacket Model MONACO Comfort combines all the desirable and conceivable details such as:

- Highest possible stability by relaxed posture.
- Ultimate adaptability for the positions: prone-standing-kneeling by use of stylised cutting techniques.
- Top Grip padding on elbow and shoulder for a better grip.
- Finished in the best materials „Made in Germany“.
- Back-piece sewn lengthwise for relaxing of the spine.
- Shoulder cut made of suede leather for more comfort in different positions.
- Front/top-side of sleeve in rough leather.
- Adjustable shoulder strap allow controlled creasing for the best fit of the butt plate.

Colour Combination:

blue / white / black – or upon your request

Material:

60% cotton, 40% leather

Lining: 100% cotton

Item No.: 99145

Colour combination - examples

2 Shooting jacket MONACO SUBRATEx

Kustermann MONACO SUBRATEx is basically the same make as our successful model MONACO "Comfort", except that for this jacket we use a newly developed synthetic fibre instead of the usual canvas. This being a technical fibre, it has the following characteristics:

- Actively respiring.
- Non-tear fabric.
- Pervious.
- Washable.
- Thermo-fixed.

Which do not change the wearing comfort during light- and temperature fluctuations. In order to benefit fully from the effect of this material, the lining is also made from this type of tissue and only in very few spots cotton is used.

Colour Combination:

black/grey - or to your desire.

Material:

70% Polyester tissue, 15% cotton

10% cotton, 5% leather

Lining: 60% Polyester tissue, 40% cotton

Item No.: 99149

MONACO SUBRATEx

1

1 Shooting pants MONACO SUBRATEx

The shooting pants Subratex is made from a mixture of Subratex outside with a canvas innerlining. The leather waist-band and fastener bring about more comfort and considerably higher durability. There is a 2-way zip on the rear-side of each leg. Top grip panels on both knees and a seat pad provide a secure „kneeling“ position. The strong innerlining ensures best holding ability. Velcro fasteners at the waist band and right leg enables individual adjustments (no pressure spots in the „prone“ position). These shooting trousers were designed by us in detail according to the needs of the World champions and Olympic winners.

Colour:

black/red - or as you desire

Material:

90% Poly, 6% leather, 4% PU (Velon)

Lining: 100% canvas

Item No.: 99222

2 Shooting pants MODELL 1

These double canvas trousers are absolute Top Quality! The leather waist-band and fastener bring about more comfort and considerably higher durability. There is a 2-way zip on the rear-side of each leg. Top grip panels on both knees and on the seat provide a secure „kneeling“ position. The strong innerlining ensures best holding ability. Velcro fasteners at the waist band and right leg enables individual adjustments (no pressure spots in the „prone“ position). These shooting trousers were designed by us in detail according to the needs of World champions and Olympic winners.

Colour combination:

black – or upon your request

Material:

95% cotton, 5% leather

Lining: 100% cotton

Item No.: 99220

2

SHOOTING BOOTS

3

3 Shooting boot Model KUSTERMANN

The Kustermann Shooting boot has all of its predecessor's main features what makes a boot more comfortable and steady.

- The whole boot is made of smooth leather, to achieve an even greater stability.
- The new boot lace stoppers allow an even more precise lacing in the lower heel area.
- The reliable 4-zone lacing for optimal position of the toes, instep, lower heel, calf and shinbone.
- Comfortable, tight lacing prevents pressure in kneeling position and adjusts immediately to any foot form.
- Double-pull Velcro fastener around the Achilles heel for individual adjustment of the boot to the foot.
- Finest finish in the outer and inner boot areas.
- Well padded tongues made of perforated material avoid pressure and guarantee perfect air circulation.
- Toe- and heel-cap are made of extremely stiff thermoplastic material.
- The shoe complies to the new ISSF rule 2013.

Colour combination: red/grey/black

Material: 100% leather

Sole: India rubber

Sizes: 36–48 (EU) / 3½–13

Item No.: 99300

SHOOTING GLOVES

The professional shooting gloves are a completely new concept and unique in their field. The innovative high-tech materials provide fully new wearing properties. The gloves protect your hands from sweating in summer or freezing in winter. Thanks to the new windstopper, cold can no longer reach your hands. The gloves can be washed and are therefore absolutely hygienic. This new high-tech product will be also produced in a special women and men model.

1 Shooting glove

Fingerless and shooting ergonomical top glove with innovative Top Grip panel.

Colour Combination:
